Capybara Sep 07 2020 The capybara is the neotropical mammal with the highest potential for production and domestication. Amongst the favorable characteristics for domestication we can list its high prolificacy, rapid growth rate, a herbivorous diet, social behavior and relative tameness. The genus (with only two species) is found from the Panama Canal to the north of Argentina on the east of the Andes. Chile is the only country in South America where the capybara is not found. The species is eaten all over its range, especially by poor, rural and traditional communities engaged in subsistence hunting. On the other hand, in large urban settlements wildlife is consumed by city dwellers as a delicacy. The sustainable management of capybara in the wild has been adopted by some South American countries, while others have encouraged capybara rearing in captivity.

Porsche 911(996) Mar 26 2022 The Porsche 911 may been in production for over 40 years, but the modern water-cooled generation share little more than a philosophy with the first examples. Known worldwide by their Porsche internal type number, the 996 models represented a fresh start and offered a new standard in sports car

performance and driving satisfaction. This new second edition packs in more specification data. We introduce all the 996 model types, describing the technical specifications, vehicle identification data, performance, colors and options. Using color photography of the cars and many actual problem areas, we introduce each model and what to look for when choosing and buying a used example.

Engine Management Apr 02 2020 Tuning engines can be a mysterious art, all engines need a precise balance of fuel, air, and timing in order to reach their true performance potential. Engine Management: Advanced Tuning takes engine-tuning techniques to the next level, explaining how the EFI system determines engine operation and how the calibrator can change the controlling parameters to optimize actual engine performance. It is the most advanced book on the market, a must-have for tuners and calibrators and a valuable resource for anyone who wants to make horsepower with a fuel-injected, electronically controlled engine.

Kill the Company Mar 14 2021 In the ever-

changing world of business, we've arrived at a point where process has trumped culture, where the race toward efficiency has left us unable to reach our potential. Stuck in the land of status quo, we've forgotten how to think. The very structures put in place to help businesses grow are now holding us back;; it's time to Kill the Company. This book is a call to arms: to start a revolution in how we think and work. But instead of more one-size-fits-all change initiatives forced upon employees, we need to embrace small changes that create ripple effects throughout the organization. Lisa Bodell urges companies to move from "Zombies, Inc." to "Think, Inc." Thinking can no longer be exclusive to the creative team or lead strategists. A culture of curiosity must be fostered among the ranks to shake up our standard practices, from unproductive meetings to go-nowhere strategic planning. This revolution can and will awaken our ability to think, and ultimately, to innovate and grow.

As the first comprehensive homage to the R and RS models, this is a must-have for all Porsche 911 lovers. At auctions they rack up premium prices, but the makers of the 911 R never intended to create

objects of speculation for maximum profit. Their main concern was developing vehicles that would appeal to customers because of their uncompromising sportiness. The story begins 50 years ago, when the first Porsche 911 R achieved five new long-distance world records in Monza; and goes on to the latest 911 R - a car that is aware of its history, with racing stripes, houndstooth bucket seats, manual gear change, and a free-revving naturally aspirated engine. In between the first and the latest lie 50 years, numerous models, and a legion of fans.

Sweet Freedom's Plains Mar 02 2020 The westward migration of nearly half a million Americans in the mid-nineteenth century looms large in U.S. history. Classic images of rugged Euro-Americans traversing the plains in their prairie schooners still stir the popular imagination. But this traditional narrative, no matter how alluring, falls short of the actual—and far more complex—reality of the overland trails. Among the diverse peoples who converged on the western frontier were African American pioneers—men, women, and children. Whether enslaved or free, they too were involved in this transformative movement. *Sweet Freedom's Plains* is a powerful retelling of the migration story from their perspective. Tracing the journeys of black overlanders who traveled the Mormon, California, Oregon, and other trails, Shirley Ann Wilson Moore describes in vivid detail what they left behind, what they encountered along the way, and what they expected to find in their new, western homes.

She argues that African Americans understood advancement and prosperity in ways unique to their situation as an enslaved and racially persecuted people, even as they shared many of the same hopes and dreams held by their white contemporaries. For African Americans, the journey westward marked the beginning of liberation and transformation. At the same time, black emigrants' aspirations often came into sharp conflict with real-world conditions in the West. Although many scholars have focused on African Americans who settled in the urban West, their early trailblazing voyages into the Oregon Country, Utah Territory, New Mexico Territory, and California deserve greater attention. Having combed censuses, maps, government documents, and white overlanders' diaries, along with the few accounts written by black overlanders or passed down orally to their living descendants, Moore gives voice to the countless, mostly anonymous black men and women who trekked the plains and mountains. *Sweet Freedom's Plains* places African American overlanders where they belong—at the center of the western migration narrative. Their experiences and perspectives enhance our understanding of this formative period in American history.

Erich Strenger and Porsche Nov 21 2021 Erich Strenger (1922-1993), an author, photographer, designer, and illustrator, left his mark on the look of Porsche during the company's formative years in the early '50s and '60s with a design language that, for the most part, continues to bear his signature to this day. He also created countless print products for this successful sports car maker, including *Christophorus Zeitschrift für die Freunde des Hauses Porsche*, the brainchild of Erich Strenger and Richard von Frankenberg. Over the course of a collaborative relationship with Porsche spanning more than thirty years, the graphic artist, who started out working alone, founded an advertising agency in the heart of Stuttgart with a staff of up to eleven permanent employees. There, Strenger would later create countless racing posters, much like those he had designed in his early days working for Dr. Ing. h.c. F. Porsche AG as a freelancer in the early '50s. Strenger was instrumental in influencing and molding the image of the Porsche brand as we know it today. This book

showcases a first-ever comprehensive collection of his work, created over the course of his collaboration with Porsche between 1951 and 1988. This monographic and monothematic publication brings the noteworthy highlights of his work to the forefront, focusing attention on the designer's approaches and methods.

SELLING POINTS: * Strenger was instrumental in influencing and molding the image of the Porsche brand as we know it today *This book showcases a first-ever comprehensive collection of Strenger's work, created over the course of his collaboration with Porsche between 1951 and 1988 300 colour images

Chesapeake Bay Cooking with John Shields Jan 12 2021 This twenty-fifth anniversary edition of John Shields's classic cookbook includes additional recipes and a new chapter on Chesapeake libations. Twenty-five years ago, *Chesapeake Bay Cooking with John Shields* introduced the world to the regional cuisine of the Mid-Atlantic. Nominated for a James Beard Award, the book was praised for its inspiring heritage recipes and its then-revolutionary emphasis on cooking with local and seasonal ingredients. Part history lesson, part travelogue,

the book captured the unique character of the Chesapeake region and its people. In this anniversary edition, John Shields combines popular classic dishes with a host of unpublished recipes from his personal archives. Readers will learn how to prepare over 200 recipes from the Mid-Atlantic region, including panfried rockfish, roast mallard, beaten biscuits, oyster fritters, and Lady Baltimore cake. Best of all, they'll learn everything they need to know about crabs—the undisputed star of Chesapeake cuisine—featured here in mouthwatering recipes for seven different kinds of crab cakes.

Extensively updated, this edition includes a new chapter on Chesapeake libations, which features Shields's closely held recipe for his notorious Dirty Gertie, an authentic Chesapeake-style Bloody Mary.

Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles

Feb 22 2022 The light-duty vehicle fleet is expected to undergo substantial technological changes over the next several decades. New powertrain designs, alternative fuels, advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less, emit less air pollutants, have more safety features, and will be more expensive to purchase relative to current vehicles. Though the gasoline-powered spark ignition engine will

continue to be the dominant powertrain configuration even through 2030, such vehicles will be equipped with advanced technologies, materials, electronics and controls, and aerodynamics. And by 2030, the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation, including autonomous vehicles, will be well underway. What are these new technologies - how will they work, and will some technologies be more effective than others? Written to inform The United States Department of Transportation's National Highway Traffic Safety Administration (NHTSA) and Environmental Protection Agency (EPA) Corporate Average Fuel Economy (CAFE) and greenhouse gas (GHG) emission standards, this new report from the National Research Council is a technical evaluation of costs, benefits, and implementation issues of fuel reduction technologies for next-generation light-duty vehicles. Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles estimates the cost, potential efficiency improvements, and barriers to commercial deployment of technologies that might be employed from 2020 to 2030. This report describes these promising technologies and makes recommendations for their inclusion on the list of technologies applicable for the 2017-2025 CAFE standards.
