The Manifesto for Teaching Online Aug 22 2021 An update to a provocative manifesto intended to serve as a platform for debate and as a resource and inspiration for those teaching in online environments. In 2011, a group of scholars associated with the Centre for Research in Digital Education at the University

of Edinburgh released "The Manifesto for Teaching Online," a series of provocative statements intended to articulate their pedagogical philosophy. In the original manifesto and a 2016 update, the authors counter both the "impoverished" vision of education being advanced by corporate and governmental edtech and higher education's traditional view of online students and teachers as second-class citizens. The two versions of the manifesto were much discussed, shared, and debated. In this book, Siân Bayne, Peter Evans, Rory Ewins, Jeremy Knox, James Lamb, Hamish Macleod, Clara O'Shea, Jen Ross, Philippa Sheail and Christine Sinclair have expanded the text of the 2016 manifesto, revealing the sources and larger arguments behind the abbreviated provocations. The book groups the twenty-one statements ("Openness is neither neutral nor natural: it creates and depends on closures"; "Don't succumb to campus envy: we are the campus") into five thematic sections examining place and identity, politics and instrumentality, the primacy of text and the ethics of remixing, the way algorithms and analytics "recode" educational intent, and how surveillance culture can be resisted. Much like the original manifestos, this book is intended as a platform for debate, as a resource and inspiration for those teaching in online environments, and as a challenge to the techno-instrumentalism of current edtech approaches. In a teaching environment shaped by COVID-19, individuals and institutions will need to do some bold thinking in relation to resilience, access, teaching quality, and inclusion.

Online Education Mar 17 2021 Online education or instruction–-any form of learning/teaching via a computer network, i.e. Internet, WWW, or LAN–is rapidly becoming a major mode of educational delivery used by schools, colleges, and corporations. ONLINE EDUCATION is a comprehensive introduction to and overview of learning and teaching in "cyberspace." Kearsley, an author of Wadsworth's DISTANCE EDUCATION: A SYSTEMS VIEW, provides pre-service and in-service teachers, college faculty, and staff with a formal survey of this new and growing educational paradigm.

Essentials of Online Course Design Feb 13 2021 In spite of the proliferation of online learning, creating online courses can still evoke a good deal of frustration, negativity, and wariness in those who need to create them. The second edition of Essentials of Online Course Design takes a fresh, thoughtfully designed, step-by-step approach to online course development. At its core is a set of standards that are based on best practices in the field of online learning and teaching. Pedagogical, organizational, and visual design principles are presented and modeled throughout the book, and users will quickly learn from the guide's hands-on approach. The course design process begins with the elements of a classroom syllabus which, after a series of guided steps, easily evolve into an online course outline. The guide's key features include: a practical approach informed by theory clean interior design that offers straightforward guidance from page one clear and jargon-free language examples, screenshots, and illustrations to clarify and support the text a checklist of online course design standards that readers can use to self-evaluate. a Companion Website with examples, adaptable templates, interactive learning features, and online resources: http://essentialsofonlinecoursedesign.com Essentials of Online Course Design serves as a best practice model for designing online courses. After reading this book, readers will find that preparing for online teaching is a satisfying and engaging experience. The core issue is simply good design: pedagogical, organizational, and visual. Online Education for Teachers of English as a Global Language Jul 21 2021 This collection offers a critical examination of online language teacher education programs (OLTE), looking at a range of issues which have informed their development and the challenges and opportunities in their implementation from a TESOL perspective. Positioning itself uniquely amongst the growing literature at the nexus of technology and language learning, the book focuses on language teacher education

programs designed for academic and professional credentials in online environments. Introductory sections provide a brief historical overview of the OLTEs as we know them today, with examples from a global range of programs toward demonstrating their theoretical and philosophical foundations. The second section of the book explores the paradigm shifts borne out of OLTE in the modes, media, and tasks employed and their subsequent impact on instructional efficacy. Subsequent chapters turn a critical lens on OLTE in raising questions around accessibility its implementation in less technologically developed environments, issues of quality measures and accreditation, and practicum concerns. Taken together, this collection is a state of the art of online language teacher education programs and lays the groundwork for future research on the nexus of online education, teacher education, and applied linguistics.

Essentials for Blended Learning Jan 15 2021 Essentials for Blended Learning: A Standards-Based Guide provides a practical, streamlined approach for creating effective learning experiences by blending online activities and the best of face-to-face teaching. This guide is: Easy to use: Clear, jargon-free writing; illustrations; and references to online resources help readers understand concepts. Streamlined: A simple but effective design process focuses on creating manageable activities for the right environment. Practical: Real-world examples from different subject areas help teachers understand principles in context. Contemporary: The variety of modern, connected technologies covered in the guide addresses a range of teaching challenges. The final chapter of the book helps you bring all four competencies together as you implement blended teaching in your classroom.

A Guide to Teaching in the Active Learning Classroom Sep 10 2020 While Active Learning Classrooms, or ALCs, offer rich new environments for learning, they present many new challenges to faculty because, among other things, they eliminate the room's central focal point and disrupt the conventional seating plan to which faculty and students have become accustomed. The importance of learning how to use these classrooms well and to capitalize on their special features is paramount. The potential they represent can be realized only when they facilitate improved learning outcomes and engage students in the learning process in a manner different from traditional classrooms and lecture halls. This book provides an introduction to ALCs, briefly covering their history and then synthesizing the research on these spaces to provide faculty with empirically based, practical guidance on how to use these unfamiliar spaces effectively. Among the questions this book addresses are: • How can instructors mitigate the apparent lack of a central focal point in the space? • What types of learning activities work well in the ALCs and take advantage of the affordances of the room? • How can teachers address familiar classroom-management challenges in these unfamiliar spaces? • If assessment and rapid feedback are critical in active learning, how do they work in a room filled with circular tables and no central focus point? • How do instructors balance group learning with the needs of the larger class? • How can students be held accountable when many will necessarily have their backs facing the instructor? • How can instructors evaluate the effectiveness of their teaching in these spaces? This book is intended for faculty preparing to teach in or already working in this new classroom environment; for administrators planning to create ALCs or experimenting with provisionally designed rooms; and for faculty developers helping teachers transition to using these new spaces.

A Teacher's Guide to Online Learning Dec 14 2020 Are you a K-12 educator who is teaching students over the internet with no face-to-face interaction? Online learning presents new challenges. Author Lindy Hockenbary does not sugarcoat the fact that online learning is different than face-to-face learning. She tackles the most common questions of new online instructors, including:?How do you engage learners in a virtual environment??How do you develop relationships with students whom you never see in person? ?What does classroom management even look like in an online class??How do you assess students when there

is no way to know if they are looking up all the answers??How do you ensure clear communication since you cannot stand over a learner's shoulder and ensure a task is accomplished??How do you communicate with and support the families of online learners??How do you ensure equity when students are never in the same physical space?This book addresses each of these questions head-on by presenting key takeaways to guide online learning design. Lindy brings her experience as a classroom teacher and instructional technologist to create a clear picture of online learning strategies. Other classroom teachers, school leaders, and instructional technologists have contributed to the book to provide a well-rounded perspective on the topic of online learning. This book was designed with K-12 teachers in mind, but the majority of information can be applied to higher education/postsecondary learning environments as well.

The Online Teaching Survival Guide Feb 25 2022 The Online Teaching Survival Guide offers faculty a wide array of theory-based techniques designed for online teaching and technology-enhanced courses. Written by two pioneers in distance education, this guidebook presents practical instructional strategies spread out over a four-phase timeline that covers the lifespan of a course. The book includes information on a range of topics such as course management, social presence, community building, and assessment. Based on traditional pedagogical theory, The Online Teaching Survival Guide integrates the latest research in cognitive processing and learning outcomes. Faculty with little knowledge of educational theory and those well versed in pedagogy will find this resource essential for developing their online teaching skills. Praise for The Online Teaching Survival Guide "At a time when resources for training faculty to teach online are scarce, Judith Boettcher and Rita-Marie Conrad have presented a must-read for all instructors new to online teaching. By tying best practices to the natural rhythms of a course as it unfolds, instructors will know what to do when and what to expect. The book is a life raft in what can be perceived as turbulent and uncharted waters." —Rena M. Palloff and Keith Pratt, program directors and faculty, Teaching in the Virtual Classroom Program, Fielding Graduate University "Developed from years of experience supporting online faculty, Judith Boettcher and Rita-Marie Conrad's book provides practical tips and checklists that should especially help those new to online teaching hit the ground running." —Karen Swan, Stukel Distinguished Professor of Educational Leadership, University of Illinois Springfield "This book blends a fine synthesis of research findings with plenty of practical advice. This book should be especially valuable for faculty teaching their first or second course online. But any instructor, no matter how experienced, is likely to find valuable insights and techniques." —Stephen C. Ehrmann, director, Flashlight Program for the Study and Improvement of Educational Uses of Technology; vice president, The Teaching, Learning, and Technology Group

Learning Design Jan 27 2022 The new field of learning design has the potential to revolutionize not only technology in education, but the whole field of teaching and learning through the application of design thinking to education. Learning Design looks inside the "black box" of pedagogy to understand what teachers and learners do together, and how the best teaching ideas can be shared on a global scale. Learning design supports all pedagogical approaches, content areas, and fields of education. The book opens with a new synthesis of the field of learning design and its place in educational theory and practice, and goes on to explore the implications of learning design for many areas of education—both practical and theoretical—in a series of chapters by Larnaca Declaration authors and other international experts.
