Sustainable Development Aug 02 2022

'Sustainable development' is the catchphrase of the 1990s. a clear and accurate account of what sustainable development actually is. David Reid gives an overview of the history of the concept and how it has evolved in recent years, describes the obstacles to achieving sustainable development, and looks at recent progress towards implementing it - and at how much we have still to do.

A Practical Guide to Drug Development in Academia Feb 25 2022 "A lot of hard-won knowledge is laid out here in a brief but informative way. Every topic is well referenced, with citations from both the primary literature

and relevant resources from the internet." Review from Nature Chemical Biology Written by the founders of the SPARK program at Stanford University, this book is a practical guide designed for professors, students and clinicians at academic research institutions who are interested in learning more about the drug development process and how to help their discoveries become the novel drugs of the future. Often many potentially transformative basic science discoveries are not pursued because they are deemed 'too early' to attract industry interest. There are simple, relatively cost-effective things that academic researchers can do to advance their findings to the point that they can be tested in the clinic or attract more industry interest. Each chapter broadly discusses an important topic in drug development, from preclinical work in assay design through clinical trial design, regulatory issues and marketing assessments. After the practical overview provided here, the reader is

encouraged to consult more detailed texts on specific topics of interest. "I would actually welcome it if this book's intended audience were broadened even more. Younger scientists starting out in the drug industry would benefit from reading it and getting some early exposure to parts of the process that they'll eventually have to understand. Journalists covering the industry (especially the small startup companies) will find this book a good reality check for many an over-hopeful press release. Even advanced investors who might want to know what really happens in the labs will find information here that might otherwise be difficult to track down in such a concentrated form."

potential donors and to be productive and enthusiastic fundraisers. More often than not, however, academic leaders are given little or no training on how to be savvy fundraisers for their institutions. *Development for Academic Leaders* is a much-needed resource that offers a concise yet comprehensive guide to fundraising for those who are new to the process. The book clarifies roles, responsibilities, programs, activities, politics, and funding sources as well as offering a review of the overall process. Written by Penelepe C. Hunt, a successful practitioner of and noted expert in academic fundraising, the book includes information on attracting and retaining effective development officers and contains suggestions for deans (and other campus leaders) for working effectively with these valued members of their institutions. Hunt introduces novice fundraisers to the cycle of giving (identification, qualification, cultivation, solicitation, and stewardship) and provides information on how and when to take part in the

fundraising process. She defines the various types of funding including annual gifts, major gifts, planned gifts, and principal gifts and reveals why ascertaining which type of gift will be most appealing to a donor is an important part of planning for a successful solicitation. *Development for Academic Leaders* also contains suggestions for overcoming reluctance on the part of leaders to ask potential donors for a gift. Hunt explains that donors do not give merely because our programs need and deserve support. They give because of their own desires, passions, and aspirations. *Development for Academic Leaders* also reveals the importance of participating in your institution's overall development communications efforts and offers a general overview of campaign and event principles and how you can use these funding strategies to the advantage of your college. For any academic leader who participates in their program's fundraising efforts, this important resource offers a wealth of information for

becoming a creative, skilled, and successful part of the fundraising team.
