Ancient Egyptian Imperialism Sep 07 2020 Offers a broad and unique look at Ancient Egypt during its long age of imperialism. Written for enthusiasts and scholars of pharaonic Egypt, as well as for those interested in comparative imperialism, this book provides a look at some of the most intriguing evidence for grand strategy, low-level insurgencies, back-room deals, and complex colonial dynamics that exists for the Bronze Age world. It explores the actions of a variety of Egypt's imperial governments from the dawn of the state until 1069 BCE as they endeavored to control fiercely independent mountain dwellers in Lebanon, urban populations in Canaan and Nubia, highly mobile Nilotic pastoralists, and predatory desert raiders. The book is especially valuable as it foregrounds the reactions of local populations and their active roles in shaping the trajectory of empire. With its emphasis on the experimental nature of imperialism and its attention to cross-cultural comparison and social history, this book offers a fresh perspective on a fascinating subject. Organized around central imperial themes—which are explored in depth at particular places and times in Egypt's history—Ancient Egyptian Imperialism covers: Trade Before Empire—Empire Before the State (c. 3500-2686); Settler Colonialism (c. 2400-2160); Military Occupation (c. 2055-1775); Creolization, Collaboration, Colonization (c. 1775-1295); Motivation, Intimidation, Enticement (c. 1550-1295); Organization and Infrastructure (c. 1458-1295); Outwitting the State (c. 1362-1332); Conversions and Contractions in Egypt's Northern Empire (c. 1295-1136); and Conversions and Contractions in Egypt's Southern Empire (c. 1550-1069). Offers a wider focus of Egypt's experimentation with empire than is covered by general Egyptologists. Draws analogies to tactics employed by imperial governments and by dominated peoples in a variety of historically documented empires, both old world and new. Answers questions such as “how often and to what degree did imperial blueprints undergo revisions?” Ancient Egyptian Imperialism is an excellent text for students and scholars of history, comparative history, and ancient history, as well for those interested in political science, anthropology, and the Biblical World.

Ecology and Power in the Age of Empire Dec 11 2020 This is a wide-ranging environmental history of late-19th and 20th century European imperialism, relating the expansion of modern empire, global trade, and mass consumption to the momentous ecological shifts they entailed and providing a historical background to the social, political, and environmental issues of the twenty-first century.

Imperialism Feb 22 2022 This volume contains a series of essays aimed at illuminating the theory, history, and roots of imperialism, which extend the analysis developed in Magdoff's *The Age of Imperialism*.

Ireland in the Age of Imperialism and Revolution, 1760-1801 Apr 26 2022

Double Impact Nov 21 2021 This collection of original historical essays sheds new light on the French colonial experience and the African reaction to it and breaks new ground by looking at both sides of the colonial equation. Editor G. Wesley Johnson believes that a double impact characterized French colonial rule in Africa during the first six decades of the twentieth century. The contributors, selected for their long experience with France or French-speaking Africa, examine nine thematic areas—the economy, the military, elites, education, art, architecture, literature, race relations and prejudice, and politics—to see if and how reciprocal impact was felt. Finally, Johnson considers the utility of double impact as a concept for understanding France and French colonial society, Africa and its colonial society, and the colonial period which enmeshed the two cultures as a whole.

Age of Imperialism Jan 12 2021

The Age of Imperialism Oct 01 2022

Rulers, Guns, and Money Nov 29 2019 Challenging traditional views of arms dealers as agents of their own countries, Grant asserts that these firms pursued their own economic interests while convincing their home governments that weapon sales meant national prestige and influence. Grant tells how the resulting arms trade eventually led to an all-out arms race, and ultimately to war.

Encyclopedia of the Age of Imperialism, 1800-1914 Nov 02 2022 This encyclopedia traces the spread of European political and economic dominance throughout the world in the century between the Napoleonic Wars and World War I.

Imperialism Without Colonies Sep 19 2021 In the decades after 1945, as colonial possessions became independent states, it was widely-believed that imperialism as a historical phenomenon was coming to an end. The six essays collected in this volume demonstrate that a new form of imperialism was, in fact, taking shape—an imperialism defined not by colonial rule but by the global capitalist market. From the outset, the dominant power in this imperialism without colonies was the United States. Magdoff's essays explain how this imperialism works, why it generates ever greater inequality, repression, and militarism, and the essential role it plays in the development of U.S. capitalism. His concluding essay presciently points out the limits of any attempted reform of the global economy which does not directly challenge the framework of capitalism. Written in the 1960s and 70s, Magdoff's essays constituted a

major contribution to Marxist theory and provided a model of rigorous argument in which theory is constantly checked against the economic reality. They provide an indispensable guide to the basic forces at work in the global politics of the twenty-first century. The Debate on the Rise of British Imperialism Aug 07 2020 This fascinating and highly useful book examines the rise of the British empire and the various debates among historians of imperialism over the past two hundred years. It discusses why the empire is so attractive to historians, why there is so much debate and controversy surrounding the subject, and how different generations of historians have read the various episodes in the history of the empire often radically differently. An engaging and useful work of historiography, this book will be essential reading for students of British imperialism attempting to get to grips with the subject. Colonial Encounters in the Age of High Imperialism Oct 21 2021 Colonial Encounters in The Age of High Imperialism is the first book in the new HarperCollins World History Series, edited by Michael Adas. This title examines the world-transforming experience of Western imperialism during the period from 1870 to 1914. Case studies focusing Specifically on Belgium and the Congo, Hawaii and the United States, and India and Britain examine the experiences of both colonizers and colonized, men and women, elite officials and faceless laborers. An introductory overview makes the study of imperialism relevant for today's students by showing them how the past relates to the present. Chapter-ending conclusions summarize important material, and suggested in-depth readings direct students to sources for further exploration. The case studies provide detailed examination of particular places and moments and invite comparison with imperialism in other parts of the world. Discussions of broader topics and larger issues, such as population redistribution, the spread of technology, military invasion, and the role of guns and medicine build upon the case studies.

The Tentacles of Progress Jun 28 2022 This penetrating examination of a paradox of colonial rule shows how the massive transfers of technology--including equipment, techniques, and experts--from the European imperial powers to their colonies in Asia and Africa resulted not in industrialization but in underdevelopment. Examining the most important technologies--shipping and railways, telegraphs and wireless, urban water supply and sewage disposal, economic botany and plantation agriculture, irrigation, and mining and metallurgy--Headrick provides a new perspective on colonial economic history and reopens the debate on the roots of Asian and African underdevelopment.

Europe in the Age of Imperialism 1880-1914 Jul 30 2022

The New Age of Empire Jun 04 2020 "If you want to get beyond gestures and slogans and to the truth, this is the book to get you there" Russell Brand "Kehinde Andrews is a crucial voice walking in a proud tradition of Black radical criticism and action" Akala "An uncompromising account of the roots of racism today" Kimberlé Crenshaw "This clear-eyed analysis insists upon the revolutionary acts of freedom we will need to break out of these systems of violence" Ibram X. Kendi The New Age of Empire takes us back to the beginning of the European Empires, outlining the deliberate terror and suffering wrought during every stage of the expansion, and destroys the self-congratulatory myth that the West was founded on the three great revolutions of science, industry and politics. Instead, genocide, slavery and colonialism are the key foundation stones upon which the West was built, and we are still living under this system today: America is now at the helm, perpetuating global inequality through business, government, and institutions like the UN, the IMF, the World Bank and the WTO. The West is rich because the Rest is poor. Capitalism is racism. The West congratulates itself on raising poverty by increments in the developing world while ignoring the fact that it created these conditions in the first place, and continues to perpetuate them. The Enlightenment, which underlies every part of our foundational philosophy today, was and is profoundly racist. This colonial logic was and is used to justify the ransacking of Black and brown bodies and their land. The fashionable solutions offered by the white Left in recent years fall far short of even beginning to tackle the West's place at the helm of a racist global order. Offering no easy answers, The New Age of Empire is essential reading to understand our profoundly corrupt global system. A work of essential clarity, The New Age of Empire is a groundbreaking new blueprint for taking Black Radical thought into the twenty-first century and beyond.

French Liberalism and Imperialism in the Age of Napoleon III Feb 10 2021 This book explores the interplay between liberalism and imperialism in Second Empire France. By examining the political dimension of imperial expansion and the power of words in shaping public opinion, it sheds light on the ways in which liberal ideas developed in the nineteenth century. In contrast to Britain, French imperialism in the third quarter of the nineteenth century was fostered by a Bonapartist regime that liberals needed to fight in order to build their own political brand. The author argues that the 1860s were not so much a period of 'liberal empire' in France as has traditionally been suggested, since liberals were in fact more conveyers of political change rather than supporters of the regime. To demonstrate how French liberals succeeded in configuring an alternative political option, the book explores their attitudes to the expanding colonial empire of Napoleon III in the 1850s and 60s through the analysis of parliamentary debates, the press and published texts. Providing three in-depth case studies on Bonapartist expansion projects in Algeria, Cochinchina and Mexico, the book provides new insights on the foundations of the liberal position on imperialism, and the intellectual outlooks and belief systems that informed these views. Analysing discourses and ideas, as opposed to facts and policies, this book presents a new perspective on the nature of the French Second Empire and illustrates how this shaped a specific liberal political culture in France. Miquel de la Rosa is a doctor in History and Civilisation by the European University Institute in Florence, Italy. He also holds a Master's in World History and a BA in Journalism by the University Pompeu Fabra in Barcelona, Spain. He has taught modern history courses at Sciences Po in France, and worked as a text editor at several academic institutions.

America in the Age of Imperialism Jul 18 2021

Indentured Labor in the Age of Imperialism, 1834-1922 May 28 2022 The indentured labour trade was begun to replace freed slaves on sugar plantations in British colonies in the 1830s, but expanded to many other locations around the world. This is the first survey of the global flow of indentured migrants from Africa that developed after the end of the slave trade and continued until shortly after the First World War. This volume describes the experiences of the two million Asians, Africans, and South Pacific Islanders who signed long-term labour contracts in return for free passage overseas, modest wages, and other benefits. The experience of these indentured migrants of different origins and destinations is compared in terms of their motives, conditions of travel, and subsequent creation of permanent overseas settlements.

Cecil Rhodes May 16 2021 In this biography, readers will discover the remarkable journey of Cecil Rhodes from England to the diamond mines, parliament houses, and battlefields of Africa. The stunning facts, vibrant images, and engaging sidebars work in

conjunction with the supportive text and helpful glossary and index to give readers a look into the Age of Imperialism and into Rhodes' life as he ventured into diamond mining, created the De Beers diamond company, started a scholarship fund, settled Rhodesia, and shaped policies that limited the rights of black South Africans through his belief in Social Darwinism.

Empire's Twin Dec 31 2019 *Empire's Twin* broadens our conception of anti-imperialist actors, ideas, and actions; it charts this story across the range of American history, from the Revolution to our own era; and it opens up the transnational and global dimensions of American anti-imperialism.

Empire as the Triumph of Theory Jul 06 2020 A key addition to our understanding of the Victorian-era British Empire, this book looks at the founders of the Colonial Society and the ideas that led them down the path to imperialism.

The Six-Day War of 1899 Mar 02 2020 In 1899, a year after the Convention of Peking leased the New Territories to Britain, the British moved to establish control. This triggered resistance by some of the population of the New Territories. There ensued six days of fighting with heavy Chinese casualties. This truly forgotten war has been thoroughly researched for the first time and recounted in lively style by Patrick Hase, an expert on the people and history of the New Territories.

The Age of Imperialism Aug 31 2022 Magdoff's analysis is the foundation upon which the work of an entire tradition of Monthly Review authors rests.

Encyclopedia of the Age of Imperialism, 1800-1914 Nov 09 2020 Presents information on the era between the Napoleonic Wars and the outbreak of World War I strongly characterized by the extension of power and dominion of some nations over many others by military coercion or by political and economic compulsions.

The Age of Empire Mar 14 2021 Erica Hobsbawm discusses the evolution of European economics, politics, arts, sciences, and cultural life from the height of the industrial revolution to the First World War. Hobsbawm combines vast erudition with a graceful prose style to re-create the epoch that laid the basis for the twentieth century.

British Imperialism Sep 27 2019 A milestone in the understanding of British history and imperialism, this ground-breaking book radically reinterprets the course of modern economic development and the causes of overseas expansion during the past three centuries. Employing their concept of 'gentlemanly capitalism', the authors draw imperial and domestic British history together to show how the shape of the nation and its economy depended on international and imperial ties, and how these ties were undone to produce the post-colonial world of today. Containing a significantly expanded and updated Foreword and Afterword, this third edition assesses the development of the debate since the book's original publication, discusses the imperial era in the context of the controversy over globalization, and shows how the study of the age of empires remains relevant to understanding the post-colonial world. Covering the full extent of the British empire from China to South America and taking a broad chronological view from the seventeenth century to post-imperial Britain today, *British Imperialism: 1688–2015* is the perfect read for all students of imperial and global history.

The Age of Colonialism Jun 16 2021 Describes events leading up to the period, why some resisted colonialism, and both the positive and negative effects of colonialism, including the spread of democracy, human rights, and religious tensions.

Sir Robert Morier: Envoy and Ambassador in the Age of Imperialism, 1876-1893 Aug 19 2021

The Six-Day War of 1899 Oct 09 2020 In 1899, a year after the Convention of Peking leased the New Territories to Britain, the British moved to establish control. This triggered resistance by some of the population of the New Territories. There ensued six days of fighting with heavy Chinese casualties. This truly forgotten war has been thoroughly researched for the first time and recounted in lively style by Patrick Hase, an expert on the people and history of the New Territories.

German Colonialism in a Global Age Jan 30 2020 This collection provides a comprehensive treatment of the German colonial empire and its significance. Leading scholars show not only how the colonies influenced metropolitan life and the character of German politics during the Bismarckian and Wilhelmine eras (1871–1918), but also how colonial mentalities and practices shaped later histories during the Nazi era. In introductory essays, editors Geoff Eley and Bradley Naranch survey the historiography and broad developments in the imperial imaginary of the nineteenth and twentieth centuries. Contributors then examine a range of topics, from science and the colonial state to the disciplinary constructions of Africans as colonial subjects for German administrative control. They consider the influence of imperialism on German society and culture via the mass-marketing of imperial imagery; conceptions of racial superiority in German pedagogy; and the influence of colonialism on German anti-Semitism. The collection concludes with several essays that address geopolitics and the broader impact of the German imperial experience. Contributors: Dirk Bönker, Jeff Bowersox, David Ciarlo, Sebastian Conrad, Christian S. Davis, Geoff Eley, Jennifer Jenkins, Birthe Kundus, Klaus Mühlhahn, Bradley Naranch, Deborah Neill, Heike Schmidt, J. P. Short, George Steinmetz, Dennis Sweeney, Brett M. Van Hoesen, Andrew Zimmerman

Designs on Empire Jul 26 2019 In the eyes of both contemporaries and historians, the United States became an empire in 1898. By taking possession of Cuba and the Philippines, the nation seemed to have reached a watershed moment in its rise to power—spurring arguments over whether it should be a colonial power at all. However, the questions that emerged in the wake of 1898 built on long-standing and far-reaching debates over America's place in the world. Andrew Priest offers a new understanding of the roots of American empire that foregrounds the longer history of perceptions of European powers. He traces the development of American thinking about European imperialism in the years after the Civil War, before the United States embarked on its own overseas colonial projects. *Designs on Empire* examines responses to Napoleon III's intervention in Mexico, Spain and the Ten Years' War in Cuba, Britain's occupation of Egypt, and the carving up of Africa at the Berlin Conference. Priest shows how observing and interacting with other empires shaped American understandings of the international environment and their own burgeoning power. He highlights ambivalence among American elites regarding empire as well as the prevalence of notions of racial hierarchy. While many deplored the way powerful nations dominated others, others saw imperial projects as the advance of civilization, and even critics often felt a closer affinity with European imperialists than colonized peoples. A wide-ranging book that blends intellectual, political, and diplomatic history, *Designs on Empire* sheds new light on the foundations of American power.

Culture and Imperialism Jun 24 2019 Following his profoundly influential study, *Orientalism*, Edward Said now examines western culture. From Jane Austen to Salman Rushdie, from Yeats to media coverage of the Gulf War, *Culture and Imperialism* is a broad,

fierce and wonderfully readable account of the roots of imperialism in European culture.

Imperialism Apr 02 2020 In his Preface to the 1902 first edition of *Imperialism: A Study*, imperial critic J.A. Hobson demonstrates his prophetic talents by noting, just as the Victorian age was ending and World War I was brewing, that "Imperialism has been adopted as a more or less conscious policy by several European States and threatens to break down the political isolation of the United States." Though the book speaks mostly of British imperialism of the period, Hobson inevitably explores the general principals-and hidden motives-of imperialist policy. Hobson covers: . the commercial value of imperialism . imperialism as an outlet for population . economic parasites of imperialism . imperialist finance . moral and sentimental factors . and much more. With imperialism again a hot topic in the political arena, Hobson's treatise continues to lend invaluable, necessary insight into a complex ideology. British writer JOHN ATKINSON HOBSON (1858-1940) was an historian and economist as well as a popular lecturer on the topics. His other books include *The Evolution of Modern Capitalism* (1894), *The Economics of Distribution* (1900), *The Economics of Unemployment* (1922), and the autobiographical *Confessions of an Economic Heretic* (1938).

Europe in the Age of Imperialism Dec 23 2021

The Age of Imperialism Jan 24 2022 Magdoff's analysis is the foundation upon which the work of an entire tradition of Monthly Review authors rests.

Enlightened Colonialism Apr 14 2021 This book further qualifies the postcolonial thesis and shows its limits. To reach these goals, it links text analysis and political history on a global comparative scale. Focusing on imperial agents, their narratives of progress, and their political aims and strategies, it asks whether Enlightenment gave birth to a new colonialism between 1760 and 1820. Has Enlightenment provided the cultural and intellectual origins of modern colonialism? For decades, historians of political thought, philosophy, and literature have debated this question. On one side, many postcolonial authors believe that enlightened rationalism helped delegitimize non-European cultures. On the other side, some historians of ideas and literature are willing to defend at least some eighteenth-century philosophers whom they consider to have been "anti-colonialists". Surprisingly enough, both sides have focused on literary and philosophical texts, but have rarely taken political and social practice into account.

A Velvet Empire Aug 26 2019 1. Empire without sovereignty: the political economy of French informal imperialism -- 2. Algeria, informal empire manqué -- 3. Champagne capitalism: the commodification of luxury and the French empire of taste -- 4. Conquest by money: the geopolitics and logistics of investment colonization -- 5. Agents of informal empire: French expatriates and extraterritorial jurisdiction in Egypt.

Colonialism, China and the Chinese May 04 2020 This book explores the place of China and the Chinese during the age of imperialism. Focusing not only on the state but also on the vitality of Chinese culture and the Chinese diaspora, it examines the seeming contradictions of a period in which China came under immense pressure from imperial expansion while remaining a major political, cultural and demographic force in its own right. Where histories of China commonly highlight episodes of conflict and subjugation in China's relations with the West, the contributions to this volume explore the complex spaces where empires and their peoples did not merely collide but also became entangled.
