Toward Gender Equality in East Asia and the Pacific Jul 26 2019 Toward Gender Equality in East Asia and the Pacific examines the relationship between gender equality and development and outlines an agenda for public action to promote more effective and inclusive development in East Asian and Pacific countries.

Well Completion Design Jun 28 2022 Completions are the conduit between hydrocarbon reservoirs and surface facilities. They are a fundamental part of any hydrocarbon field development project. They have to be designed for safely maximising the hydrocarbon recovery from the well and may have to last for many years under ever changing conditions. Issues include: connection with the reservoir rock, avoiding sand production, selecting the correct interval, pumps and other forms of artificial lift, safety and integrity, equipment selection and installation and future well interventions. * Course book based on course well completion design by TRACS International * Unique in its field: Coverage of offshore, subsea, and landbased completions in all of the major hydrocarbon basins of the world. * Full colour

The Day After Tomorrow Nov 21 2021 This book is a vision of how economic policy will evolve in developing countries over the next three-to-five years, delivered by renowned practitioners working at the world's leading development institution.

Organic Pollutants Jan 30 2020 Organic pollutants cause several environmental problems if discharged to air or water body. The occurrence of organic pollutants in the ecosystem, their risk and removal methods are very important issues. This book deals with several aspects of organic pollutants, especially in the light of organic pollutants monitoring, risk assessment as well as the practical application of different techniques for removing it from the environment. The book is divided into three sections contains 9 chapters. The first section explains monitoring of organic

pollutants in soil and water. The second section discusses its risk to human, soil and plants. The third section focuses on the different treatment processes for the removal of organic pollutants.

The Environment and Human Health :. Nov 02 2022

Reaching the Marginalized Oct 28 2019 Children at risk of marginalization in education are found in all societies. At first glance, The lives of these children may appear poles apart. The daily experiences of slum dwellers in Kenya, ethnic minority children in Viet Nam and a Roma child in Hungary are very different. What they have in common are missed opportunities to develop their potential, realize their hopes and build a better future through education. A decade has passed since world leaders adopted the Education for All goals. While progress has been made, millions of children are still missing out on their right to education. Reaching the marginalized identifies some of the root causes of disadvantage, both within education and beyond, and provides examples of targeted policies and practices that successfully combat exclusion. Set against the backdrop of the global economic crisis, The Report calls for a renewed financing commitment by aid donors and recipient governments alike to meet the Education for All goals by 2015. This is the eighth edition of the annual EFA Global Monitoring Report. The Report includes statistical indicators on all levels of education in more than 200 countries and territories.

U.S. Manufacturers Directory Dec 31 2019

Health Systems in Transition Sep 19 2021 The book provides a thorough review of the U.S. health care system, including its organization and financing, care delivery, recent reforms, and an evaluation of the system's performance.

Mental Health Stigma in the Military Dec 23 2021 This report assesses the U.S. military's approach to reducing stigma for mental health disorders and their treatment, how well it is working, and how it might be improved. It presents priorities for program and policy development and research and evaluation to get service members the treatment they need as efficiently and effectively as possible.

Pediatric Rheumatic Diseases Jun 24 2019 Occupational therapists who work with adults with neurological problems must be able to appropriately and quickly use a variety of screening methods to pinpoint deficit areas and assess how these have impaired the person's daily life function. This comprehensive book compiles the most common occupational therapy screening methods used with adults with neurological conditions. Presented as a step-by-step instruction manual, the book includes copies of all screens and is presented in an easy-to-use format that facilitates its use in the clinic and in home health and community-based settings. It is also an ideal text for students, clearly outlining how to administer neurological screens in occupational therapy practice. Extensive use of photographs enhances the instructions and clearly shows practitioners how to use the various techniques. Book jacket.

EMOOCs 2021 Oct 21 2021 From June 22 to June 24, 2021, Hasso Plattner Institute, Potsdam, hosted the seventh European MOOC Stakeholder Summit (EMOOCs 2021) together with the eighth ACM Learning@Scale Conference. Due to the COVID-19 situation, the conference was held fully online. The boost in digital education worldwide as a result of the pandemic was also one of the main topics of this year's EMOOCs. All institutions of learning have been forced to transform and redesign their educational methods, moving from traditional models to hybrid or completely online models at scale. The learnings, derived from practical experience and research, have been explored in EMOOCs 2021 in six tracks and additional workshops, covering various aspects of this field. In this publication, we present papers from the conference's Experience Track, the Policy Track, the Business Track, the International Track, and the Workshops.

Global Productivity Aug 31 2022 The COVID-19 pandemic struck the global economy after a decade that featured a broad-based slowdown in productivity growth. *Global Productivity: Trends, Drivers, and Policies* presents the first comprehensive analysis of the evolution and drivers of

productivity growth, examines the effects of COVID-19 on productivity, and discusses a wide range of policies needed to rekindle productivity growth. The book also provides a far-reaching data set of multiple measures of productivity for up to 164 advanced economies and emerging market and developing economies, and it introduces a new sectoral database of productivity. The World Bank has created an extraordinary book on productivity, covering a large group of countries and using a wide variety of data sources. There is an emphasis on emerging and developing economies, whereas the prior literature has concentrated on developed economies. The book seeks to understand growth patterns and quantify the role of (among other things) the reallocation of factors, technological change, and the impact of natural disasters, including the COVID-19 pandemic. This book is must-reading for specialists in emerging economies but also provides deep insights for anyone interested in economic growth and productivity. Martin Neil Baily Senior Fellow, The Brookings Institution Former Chair, U.S. President's Council of Economic Advisers This is an important book at a critical time. As the book notes, global productivity growth had already been slowing prior to the COVID-19 pandemic and collapses with the pandemic. If we want an effective recovery, we have to understand what was driving these long-run trends. The book presents a novel global approach to examining the levels, growth rates, and drivers of productivity growth. For anyone wanting to understand or influence productivity growth, this is an essential read. Nicholas Bloom William D. Eberle Professor of Economics, Stanford University The COVID-19 pandemic hit a global economy that was already struggling with an adverse pre-existing condition—slow productivity growth. This extraordinarily valuable and timely book brings considerable new evidence that shows the broad-based, long-standing nature of the slowdown. It is comprehensive, with an exceptional focus on emerging market and developing economies. Importantly, it shows how severe disasters (of which COVID-19 is just the latest) typically harm productivity. There are no silver bullets, but the book suggests sensible strategies to improve growth prospects. John Fernald Schrodgers Chaired Professor of European Competitiveness and Reform and Professor of Economics, INSEAD

Developing Adaptation Policy and Practice in Europe: Multi-level Governance of Climate Change Mar 02 2020 Mitigation will not be sufficient for us to avoid climate change and we will need to adapt to its consequences. This book targets the development of adaptation policy in European countries with different relations between central and regional/local government.

Early Warning for Geological Disasters Jan 24 2022 The past years have seen new technologies that could be utilized for early warning and real-time loss estimation. They include self-organizing sensor networks, new satellite imagery with high resolution, multi-sensor observational capacities, and crowd sourcing. From this and improved physical models, data processing and communication methodologies a significant step towards better early warning technologies has been achieved by research. At the same time, early warning systems became part of the disaster management practice for instance in Japan and Indonesia. This book marks the important point where: Research activities continue to improve early warning Experience with applications is expanding At this critical point in development of early warning for geological disasters it is timely to provide a volume that documents the state-of-the-art, provides an overview on recent developments and serves as knowledge resource for researcher and practitioners.

Gangs and Organized Crime Sep 07 2020 In *Gangs and Organized Crime*, George W. Knox, Gregg W. Etter, and Carter F. Smith offer an informed and carefully investigated examination of gangs and organized crime groups, covering street gangs, prison gangs, outlaw motorcycle gangs, and organized crime groups from every continent. The authors have spent decades investigating gangs as well as researching their history and activities, and this dual professional-academic perspective informs their analysis of gangs and crime groups. They take a multidisciplinary approach that combines criminal justice, public policy and administration, law, organizational behavior, sociology, psychology, and urban planning perspectives to provide insight into the actions and interactions of a variety of groups and their members. This textbook is ideal for criminal justice and sociology courses on gangs as well as related course topics like gang behavior, gang crime and the inner city, organized crime families, and transnational

criminal groups. Gangs and Organized Crime is also an excellent addition to the professional's reference library or primer for the general reader. More information is available at the supporting website - www.gangsandorganizedcrime.com

Sustainable Consumption and Production Apr 14 2021 "This Handbook is an output of UNEP's work towards the implementation of the 10-Year Framework of Programmes on Sustainable Consumption and Production (SCP). This global edition is based on a pilot edition for Asia and the Pacific region that was developed under the EU funded and UNEP managed Regional Policy Support Component of the SWITCH-Asia programme. It is designed to assist policymakers in developing, implementing, monitoring and evaluating policies that support the transition towards SCP. It includes numerous case studies highlighting SCP opportunities and existing successful initiatives from across the world."--Publisher's description.

Securities Journal May 04 2020

From Biocultural Homogenization to Biocultural Conservation Dec 11 2020 To assess the social processes of globalization that are changing the way in which we co-inhabit the world today, this book invites the reader to essay the diversity of worldviews, with the diversity of ways to sustainably co-inhabit the planet. With a biocultural perspective that highlights planetary ecological and cultural heterogeneity, this book examines three interrelated themes: (1) biocultural homogenization, a global, but little perceived, driver of biological and cultural diversity loss that frequently entail social and environmental injustices; (2) biocultural ethics that considers -ontologically and axiologically- the complex interrelationships between habits, habitats, and co-inhabitants that shape their identity and well-being; (3) biocultural conservation that seeks social and ecological well-being through the conservation of biological and cultural diversity and their interrelationships.

Handbook of Causal Analysis for Social Research Feb 22 2022 What constitutes a causal explanation, and must an explanation be causal? What warrants a causal inference, as opposed to a descriptive regularity? What techniques are available to detect when causal effects are present, and when can these techniques be used to identify the relative importance of these effects? What complications do the interactions of individuals create for these techniques? When can mixed methods of analysis be used to deepen causal accounts? Must causal claims include generative mechanisms, and how effective are empirical methods designed to discover them? The Handbook of Causal Analysis for Social Research tackles these questions with nineteen chapters from leading scholars in sociology, statistics, public health, computer science, and human development.

Intelligent Distributed Computing VII Mar 14 2021 This book represents the combined peer-reviewed proceedings of the Seventh International Symposium on Intelligent Distributed Computing - IDC-2013, of the Second Workshop on Agents for Clouds - A4C-2013, of the Fifth International Workshop on Multi-Agent Systems Technology and Semantics - MASTS-2013, and of the International Workshop on Intelligent Robots - iR-2013. All the events were held in Prague, Czech Republic during September 4-6, 2013. The 41 contributions published in this book address many topics related to theory and applications of intelligent distributed computing and multi-agent systems, including: agent-based data processing, ambient intelligence, bio-informatics, collaborative systems, cryptography and security, distributed algorithms, grid and cloud computing, information extraction, intelligent robotics, knowledge management, linked data, mobile agents, ontologies, pervasive computing, self-organizing systems, peer-to-peer computing, social networks and trust, and swarm intelligence.

Handbook on Rice Policy for Asia Nov 09 2020

Youth and Skills May 16 2021 "Many young people around the world --- especially the disadvantaged --- are leaving school without the skills they need to thrive in society and find decent jobs. As well as thwarting young people's hopes, these education failures are jeopardizing equitable economic growth and social cohesion, and preventing many countries from reaping the potential benefits of their growing youth populations. The 2012 Education for All Global Monitoring Report examines how skills development programmes can be improved to boost young people's

opportunities for decent jobs and better lives."--Publisher's description

Diagnosis and Control of Diseases of Fish and Shellfish Sep 27 2019 There has been a continual expansion in aquaculture, such that total production is fast approaching that of wild-caught fisheries. Yet the expansion is marred by continued problems of disease. New pathogens emerge, and others become associated with new conditions. Some of these pathogens become well established, and develop into major killers of aquatic species. *Diagnosis and Control of Diseases of Fish and Shellfish* focuses on the diagnosis and control of diseases of fish and shellfish, notably those affecting aquaculture. Divided into 12 chapters, the book discusses the range of bacterial, viral and parasitic pathogens, their trends, emerging problems, and the relative significance to aquaculture. Developments in diagnostics and disease management, including the widespread use of serological and molecular methods, are presented. Application/dose and mode of action of prebiotics, probiotics and medicinal plant products used to control disease are examined, as well as the management and hygiene precautions that can be taken to prevent/control the spread of disease. This book will be a valuable resource for researchers, students, diagnosticians, veterinarians, fish pathologists and microbiologists concerned with the management of diseases of fish and shellfish.

Cheating at Gambling Oct 09 2020

A Recovery for All Jul 18 2021 The world's financial and economic crisis has taken a toll on children and poor households. High food and commodity prices, unemployment and austerity measures have aggravated persistent inequalities and contributed to a substantial rise in hunger and social tensions. Now, more than ever, investments for the world's poor are needed to recover lost ground in pursuit of development objectives. People everywhere are demanding change. This book describes the social impacts of the crisis, policy responses to date and United Nations alternative proposals for 'A Recovery for All.' With a foreword by Sir Richard Jolly.

Computational Fluid-Structure Interaction Jan 12 2021 *Computational Fluid-Structure Interaction: Methods and Applications* takes the reader from the fundamentals of computational fluid and solid mechanics to the state-of-the-art in computational FSI methods, special FSI techniques, and solution of real-world problems. Leading experts in the field present the material using a unique approach that combines advanced methods, special techniques, and challenging applications. This book begins with the differential equations governing the fluid and solid mechanics, coupling conditions at the fluid-solid interface, and the basics of the finite element method. It continues with the ALE and space-time FSI methods, spatial discretization and time integration strategies for the coupled FSI equations, solution techniques for the fully-discretized coupled equations, and advanced FSI and space-time methods. It ends with special FSI techniques targeting cardiovascular FSI, parachute FSI, and wind-turbine aerodynamics and FSI. Key features: First book to address the state-of-the-art in computational FSI Combines the fundamentals of computational fluid and solid mechanics, the state-of-the-art in FSI methods, and special FSI techniques targeting challenging classes of real-world problems Covers modern computational mechanics techniques, including stabilized, variational multiscale, and space-time methods, isogeometric analysis, and advanced FSI coupling methods Is in full color, with diagrams illustrating the fundamental concepts and advanced methods and with insightful visualization illustrating the complexities of the problems that can be solved with the FSI methods covered in the book. Authors are award winning, leading global experts in computational FSI, who are known for solving some of the most challenging FSI problems *Computational Fluid-Structure Interaction: Methods and Applications* is a comprehensive reference for researchers and practicing engineers who would like to advance their existing knowledge on these subjects. It is also an ideal text for graduate and senior-level undergraduate courses in computational fluid mechanics and computational FSI.

Kill the Company Jul 30 2022 In the ever-changing world of business, we've arrived at a point where process has trumped culture, where the race toward efficiency has left us unable to reach our potential. Stuck in the land of status quo, we've forgotten how to think. The very structures put in

place to help businesses grow are now holding us back;; it's time to Kill the Company. This book is a call to arms: to start a revolution in how we think and work. But instead of more one-size-fits-all change initiatives forced upon employees, we need to embrace small changes that create ripple effects throughout the organization. Lisa Bodell urges companies to move from "Zombies, Inc." to "Think, Inc." Thinking can no longer be exclusive to the creative team or lead strategists. A culture of curiosity must be fostered among the ranks to shake up our standard practices, from unproductive meetings to go-nowhere strategic planning. This revolution can and will awaken our ability to think, and ultimately, to innovate and grow.

Understanding the Behaviour and Improving the Welfare of Pigs Nov 29 2019 After an initial review of genetic and developmental factors affecting pig behaviour, the book assesses ways of optimising pig welfare at differing production stages from breeding through to slaughter. The final parts of the book discuss issues such as castration and tail biting as well as ways of measuring and monitoring welfare.

Gender Equality and the Labor Market Apr 02 2020 This report comprises a gendered analysis of labor markets, policies, and legislation in Cambodia, Kazakhstan, and the Philippines. It provides policy recommendations that may expand work opportunities for women in specific sectors. Increasing job opportunities and decent work for women are essential for inclusive growth, and they are vital for advancing economic and social development in a country. This approach to attaining economic and social wealth is based on reliable academic and statistical evidence and is increasingly accepted by international and national financial and development organizations across the globe. In Asia, mostly women continue to experience the greatest disadvantages resulting from gender inequalities and entrenched discrimination in work and in life. The economic and social contributions made by women in the family, the workplace, and society tend to be devalued. There are, however, many strategies which have been developed to counter gender discrimination and promote equality for working men and women through legislation and social and economic policies to reverse the unequal labor market outcomes for women. To document the nature and extent of gender inequalities in the labor market, as well as to capture and share these promising initiatives, ADB initiated studies in three countries - Cambodia, Kazakhstan, and the Philippines - to identify how these countries promote gender equality in their labor markets. This report comprises a gendered analysis of labor markets, policies, and legislation in each country and provides recommendations for legislation and policies that have the potential to expand or improve employment and work opportunities for women in specific sectors.

Aesthetic Experience Mar 26 2022 In this volume, a team of internationally respected contributors theorize the concept of aesthetic experience and its value. Exposing and expanding our restricted cultural and intellectual presuppositions of what constitutes aesthetic experience, the book aims to re-explore and affirm the place of aesthetic experience--in its evaluative, phenomenological and transformational sense--not only in relation to art and artists but to our inner and spiritual lives.

Poverty Mosaics: Realities and Prospects in Small-Scale Fisheries Aug 26 2019 Small-scale fisheries are a major source of food and employment around the world. Yet, many small-scale fishers work in conditions that are neither safe nor secure. Millions of them are poor, and often they are socially and politically marginalized. Macro-economic and institutional mechanisms are essential to address these poverty and vulnerability problems; however, interventions at the local community level are also necessary. This requires deep understanding of what poverty means to the fishers, their families and communities; how they cope with it; and the challenges they face to increase resiliency and improve their lives for the better. This book provides a global perspective, situating small-scale fisheries within the broad academic discourse on poverty, fisheries management and development. In-depth case studies from fifteen countries in Latin America, Europe, South and Southeast Asia, and sub-Saharan Africa, demonstrate the enormously complex ecological, economic, social, cultural and political contexts of this sector. Conclusions for policy-making, formulated as a joint statement by the authors, argue that fisheries development, poverty alleviation, and resource management must be integrated within a

comprehensive governance approach that also looks beyond fisheries. The scientific editors, Svein Jentoft and Arne Eide, are both with the Norwegian College of Fishery Science, Faculty of Biosciences, Fisheries and Economics, University of Tromsø, Norway.

Contact Force Models for Multibody Dynamics Jun 16 2021 This book analyzes several compliant contact force models within the context of multibody dynamics, while also revisiting the main issues associated with fundamental contact mechanics. In particular, it presents various contact force models, from linear to nonlinear, from purely elastic to dissipative, and describes their parameters. Addressing the different numerical methods and algorithms for contact problems in multibody systems, the book describes the gross motion of multibody systems by using a two-dimensional formulation based on the absolute coordinates and employs different contact models to represent contact-impact events. Results for selected planar multibody mechanical systems are presented and utilized to discuss the main assumptions and procedures adopted throughout this work. The material provided here indicates that the prediction of the dynamic behavior of mechanical systems involving contact-impact strongly depends on the choice of contact force model. In short, the book provides a comprehensive resource for the multibody dynamics community and beyond on modeling contact forces and the dynamics of mechanical systems undergoing contact-impact events.

Insect and Hydroponic Farming in Africa Aug 19 2021 This book presents an inclusive, and resilient solution to Africa's wide-ranging food security challenges, particularly in fragility, conflict, and violence-affected countries. It assesses the costs and benefits of using two frontier agriculture technologies, insect farming and plant hydroponics, to create a circular food economy in Africa.

Positive Human Functioning from a Multidimensional Perspective Feb 10 2021 The main goal of this volume is to analyse human development through the life cycle. Using examples of life skills and exercise practice, topics related to how to organise life skills programs for children, youth, and adults and how to assume healthy life styles by doing regular exercise are discussed. How to promote positive development across the life cycle is also addressed by numerous authors.

Outer Continental Shelf Oil & Gas Leasing Program, 2012-2017 May 28 2022 Describes the potential environmental impacts of the Proposed Final 2012-2017 Outer Continental Shelf (OCS) Oil and Gas Leasing Program (PFP), which establishes a schedule that is used as a basis for considering where and when oil and gas leasing might be appropriate over a 5-year period.

Classical Economics Today Jun 04 2020 "Classical Economics Today: Essays in Honor of Alessandro Roncaglia" comprises a collection of original essays by leading economists who adopt a Classical approach to political economy. The essays showcase the relevance and topicality of the Classical approach, as opposed to the sterility and real-world irrelevance of mainstream economics.

Amtsblatt der Preußischen Regierung zu Koblenz Jul 06 2020

Carnivorous Plants Oct 01 2022 This book is a synthesis of the latest research on carnivorous plants, focusing on their physiology, ecology, evolution, and future conservation and research efforts

Climate Change 2013: The Physical Science Basis Apr 26 2022 The Fifth Assessment Report of the IPCC is the standard scientific reference on climate change for students, researchers and policy makers.

Friendship, Descent and Alliance in Africa Aug 07 2020 Friendship, descent and alliance are basic forms of relatedness that have received unequal attention in social anthropology. Offering new insights into the ways in which friendship is conceptualized and realized in various sub-Saharan African settings, the contributions to this volume depart from the recent tendency to study friendship in isolation from kinship. In drawing attention to the complexity of the interactions between these two kinds of social relationships, the book suggests that analyses of friendship in Western societies would also benefit from research that explores more systematically friendship in conjunction with kinship.
