The Politics of Security Sector Reform Jul 18 2021 Security Sector Reform (SSR) is increasingly becoming a cornerstone in international security and development cooperation. Indeed, the concept has often been seen as a panacea for many of the biggest threats to the world such as failed states, terrorism and poverty. In particular, this book focuses on the complexities of implementation of SSR across the globe and the actual and potential role for the European Union (EU) to play in SSR. As suggested in the title of the book, this involves not only opportunities, but challenges to be overcome as well. There are three core themes to this book: Policy, Policies and Practice. By presenting the themes in this particular order a greater appreciation of the influences on the process of SSR, from conception to implementation is relayed to the reader. This volume appeals to audiences interested in the EU as a global actor and the interrelationships between foreign, security, defence and development policies.

European Journal of Tourism Research May 28 2022 The European Journal of Tourism Research is an interdisciplinary scientific journal in the field of tourism, published by Varna University of Management, Bulgaria. Its aim is to provide a platform for discussion of theoretical and empirical problems in tourism. Publications from all fields, connected with tourism such as management, marketing, sociology, psychology, geography, political sciences, mathematics, statistics, anthropology, culture, information technologies and others are invited. The journal is open to all researchers. Young researchers and authors from Central and Eastern Europe are encouraged to submit their contributions. Regular Articles in the European Journal of Tourism Research should normally be between 4 000 and 20 000 words. Major research articles of between 10 000 and 20 000 are highly welcome. Longer or shorter papers will also be considered. The journal publishes also Research Notes of 1 500 – 2 000 words. Submitted papers must combine theoretical concepts with practical applications or empirical testing. The European Journal of Tourism Research includes also the following sections: Book Reviews, announcements for Conferences and Seminars, abstracts of successfully defended Doctoral Dissertations in Tourism, case studies of Tourism Best Practices. The European Journal of Tourism Research is published in three Volumes per year. The full text of the European Journal of Tourism Research is available in the following databases: EBSCO Hospitality and Tourism CompleteCABI Leisure, Recreation and TourismProQuest Research Library Individual articles can be rented via journal's page at DeepDyve. The journal is indexed in Scopus and Thomson Reuters' Emerging Sources Citation Index. The editorial team welcomes your submissions to the European Journal of Tourism Research.

Physiological, Molecular, and Genetic Perspectives of Wheat Improvement Aug 19 2021 World population is growing at an alarming rate and may exceed 9.7 billion by 2050, whereas agricultural productivity has been negatively affected due to yield limiting factors such as biotic and abiotic stresses as a result of global climate change. Wheat is a staple crop for ~20% of the world population and its yield needs be augmented correspondingly in order to satisfy the demands of our increasing world population. “Green revolution”, the introduction of semi-dwarf, high yielding wheat varieties along with improved agronomic management practices, gave rise to a substantial increase in wheat production and self-sufficiency in developing countries that include Mexico, India and other south Asian countries. Since the late 1980’s, however, wheat yield is at a standoff with little fluctuation. The current trend is thus insufficient to meet the demands of an increasing world population. Therefore, while conventional breeding has had a great impact on wheat yield, with climate change becoming a reality, newer molecular breeding and management tools are needed to meet the goal of improving wheat yield for the future. With the advance in our understanding of the wheat genome and more importantly, the role of environmental interactions on productivity, the idea of genomic selection has been proposed to select for multi-genic quantitative traits early in the breeding cycle. Accordingly genomic selection may remodel wheat breeding with gain that is predicted to be 3 to 5 times that of crossbreeding. Phenomics (high-throughput phenotyping) is another fairly recent advancement using contemporary sensors for wheat germplasm screening and as a selection tool. Lastly, CRISPR/Cas9 ribonucleoprotein mediated genome editing technology has been successfully utilized for efficient and specific genome editing of hexaploid bread wheat. In summary, there has been exciting progresses in the development of non-GM wheat plants resistant to biotic and abiotic stress and/or wheat with improved nutritional quality. We believe it is important to highlight these novel research accomplishments for a broader audience, with the hope that our readers will ultimately adopt these powerful technologies for crops improvement in order to meet the demands of an expanding world population.

Security Sector Reform in Constitutional Transitions Dec 11 2020 Security sector reform (SSR) is central to the democratic transitions currently unfolding across the globe, as a diverse range of countries grapple with how to transform militias, tribal forces, and dominant military, police, and intelligence agencies into democratically controlled and accountable security services. SSR will be a key element in shifts from authoritarian to democratic rule for the foreseeable future, since abuse of the security sector is a central technique of autocratic government. This edited collection advances solutions through a selection of case studies from around the world that cover a wide range of contexts.

Next Generation Networks. Networks and Services for the Information Society Jun 28 2022 Acknowledgements This Volume could not exist without the contributors of its papers. We would like to thank them on behalf of the

Symposium organisers, for their support in making this a very successful conference. The editors would also like to thank all reviewers for their help in selecting quality papers. Organising such international events is not easy without the support of sponsors. We would like to thank TELENOR, which was very generous in accepting to host this conference under its Patronage. Our sincere thanks also go to all industrial sponsors and to the members and staff of the European Commission, who provided support of various kinds. In particular we would like to thank Dr. Paulo de Sousa of the European Commission, who helped us integrating the NGN concertation activity into the conference, and Ms. May Krosby of Telenor, who took care of the Secretariat. Last but not least, our sincere thanks to committee members who provided timely help in realising this conference and to our publishers Springer-Verlag for bringing out an excellent volume in time for the conference.

Network World Feb 22 2022 For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.

Dictionary of Youth Justice Oct 01 2022 This Dictionary explicitly addresses the historical, legal, theoretical, organisational, policy, practice, research and evidential contexts within which 'modern' youth justice in the UK and beyond is located. The entries cover a spectrum of theoretical orientations and conceptual perspectives and engage explicitly with the key statutory provisions and policy and practice imperatives within each of the three UK jurisdictions. This book is a key resource for those teaching and studying under-graduate and post-graduate courses in criminology, criminal justice, sociology, social policy, law, socio-legal studies, community justice, social work, youth and community work and police studies, together with policy-makers, managers and practitioners working within the youth justice sphere (including staff training officers, youth justice officers, social workers, probation officers, police officers, teachers and education workers, health professionals, youth workers, drug and alcohol workers and juvenile secure estate staff). The Dictionary of Youth Justice: is designed to meet the needs of researchers, policy-makers, managers, practitioners and students; begins with an introductory chapter that maps the key shifts in contemporary national and international youth justice systems; contains over 300 alphabetically arranged entries - written by almost 100 experts in the respective fields - that explicitly address the core components of youth justice in England and Wales, Northern Ireland and Scotland; Provides specifically tailored recommended key texts and sources in respect of each entry; is closely cross-referenced and contains a detailed index to assist readers to make connections between and across entries; includes a detailed 'Directory of Agencies' that relate to youth justice in each of the three UK jurisdictions; is compiled and edited by one of the UK's leading authorities in youth justice.

Afghanistan Dec 31 2019 By the fall of 2008, seven years after the fall of the Taliban regime, the future of Afghanistan's post-conflict transition looks more uncertain than ever. Driving this uncertainty is a security environment that has steadily deteriorated with each passing year, creating a level of instability even greater in Iraq, according to some indicators. However, insecurity is not the only dilemma that has threatened to undercut Afghanistan's transition to peace and stability. Problems of corruption and poor service delivery in the state coupled with the failure of the internationally-supported reconstruction process to improve the quality of life for so many Afghans trapped in grinding poverty has begun to erode public confidence in the new political order.

Comparative Studies and Regionally-Focused Cases Examining Local Governments Nov 21 2021 In the era of globalization, comparative government and politics have come to the forefront due to the transformations of the social welfare state and the subsequent social, economic, political, cultural, technological and administrative changes. Taking a particular look at local government systems can uncover new perspectives on issues related to globalization, localization, governance, new democracy movements, managerial reformation, and privatization. Comparative Studies and Regionally-Focused Cases Examining Local Governments is a pivotal reference source for the latest scholarly research on the role played by local governments in overall administration, types and models of government at the local level, consequences of managerial reformations, and new develops regarding structure, process, personnel, and policymaking aspects of government. Highlighting relevant perspectives from comparative research and case studies, this book is ideally designed for students, government officials, politicians, civil society representatives, and academicians.

Seamless Sky Nov 09 2020 The strategic vision of the civil aviation community is to achieve integrated global air traffic management through the worldwide implementation of Communications, Navigation, Surveillance and Air Traffic management (CNS/ATM) systems in a progressive, cost-effective and co-operative manner. Existing books cover only general aspects, while details are scattered across professional magazines and ICAO publications. As the states (providers of service) and users (airlines) collectively address the next steps to achieve an integrated, global air traffic management system using a single sky approach which is safe, seamless and smart, Seamless Sky provides a means to achieve it. concept, it covers ATM aspects, technical features of CNS, the planning mechanism, operational scenarios and harmonization issues with details in step-by-step approach for its implementation eventually giving rise to a seamless sky. systems and should serve the basic needs of state planners, civil aviation professionals and pilots. It is designed to be user friendly with numerous decision trees, practical tips and flow charts. It incorporates current practices in the states/industry and at the same elaborates future trends through the ongoing work programme of ICAO. harmonization of systems and procedures. It shows the reader how to establish the CNS/ATM infrastructure using a co-operative and cost effective approach and provides the means to harmonize the implementation between states and users using appropriate tools and mechanisms.

Electronic Services: Concepts, Methodologies, Tools and Applications Apr 02 2020 With the increasing reliance on digital means to transact goods that are retail and communication based, e-services continue to develop as key applications for business, finance, industry and innovation. Electronic Services: Concepts, Methodologies, Tools and Applications is an all-inclusive research collection covering the latest studies on the consumption, delivery and availability of e-services. This multi-volume book contains over 100 articles, making it an essential reference for the evolving e-services discipline.

Transportation, Communications, and Electric Power in the USSR. Mar 14 2021 This report presents unevaluated information selected from Russian-language publications as indicated. It is produced and disseminated as an aid to United States Government research.

PISA Mar 26 2022 This report introduces the programming system PISA intended for the interactive production of application software. The heart of the programming system is a new programming language, also called PISA. An interactive environment for this language permits the creation, test, maintenance, and usage of PISA programs in a real-time dialogue fashion. Both the programming language and its interactive environment are described without any reference to a specific implementation. Together, they form a well defined programming system whose components interact harmoniously. The programming system PISA is dedicated to application software production. This implies that production of system software and online-control programs is not a goal of PISA. Furthermore, it means that PISA must meet several requirements as they arise from commercial application software production, the most stringent ones being economy, availability, and compatibility: In the long term the overall cost of software production and usage with such a programming system must be less than with conventional means, the programming system must be available or implementable on a wide range of computer systems currently used, and existing data must be accessible in its actual physical representation. The definition of PISA is given in a heavily annotated form in this report: Examples for the use of single componer.ts as well as for the entire system are presented, most of the lan~uage constructs and system facilities are commented on briefly, and the implications of the programming system's design on implementability and portability issues are discussed.

National Ownership and Security Sector Reform in Mali Nov 29 2019 Karoline Eickhoff provides an in-depth analysis of the role that national ownership as a key policy principle of international development and peacebuilding plays in shaping the discourses and practices of external interventions in the context of the peace process in Mali. Engaging critically with the day-to-day work experience and perceptions of practitioners working on supporting the reform of the Malian security sector in 2015-2016, the author explores how external actors 'make sense' of an abstract policy model vis-à-vis other organisational demands and constraints arising at the field level. This book concludes with policy recommendations on how the gap between ownership policy and external actors' field-level practices can be addressed.

Network World Dec 23 2021 For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and

electronic commerce.

Network World May 16 2021 For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.

Directory of Soviet Research and Educational Organizations Apr 26 2022

Security Sector Reform in Liberia Jun 04 2020 The author presents an explanatory overview and analysis of progress made with the process of security sector reform in Liberia -- with particular reference to the armed forces and the police. The author begins with a concise review of what the theory of SSR and its application in the Liberian context and follows with a description of Liberia's post-war security architecture and the urgent need for a comprehensive and sustained process of reform. An overview of the legal and conceptual framework for engaging in SSR in Liberia is provided as further backdrop to substantive sections dealing with the reform (or re-building) of the Armed Forces of Liberia and the Liberia National Police. The author concludes with a critical analysis of the SSR process and recommendations for further action.

The South African Mechanical Engineer Oct 09 2020

Intergovernmental Organisations and Security Sector Reform Oct 21 2021 Intergovernmental organisations (IGOs) play a crucial role in security sector reform and governance (SSR/G). In virtually all instances of recent and current SSR programme delivery, IGOs have either led the SSR effort or supported the lead provided by other actors. How this role is played is of vital importance for the prospects of fostering durable security and development in a wide range of countries. This volume looks at a selection of organisations that have been in the forefront of SSR activity or that have the potential for significantly developing their SSR agendas in the future. These IGOs are the Organisation for Economic Cooperation and Development (OECD), the European Union (EU), the North Atlantic Treaty Organisation (NATO), the Organisation for Security and Co-operation in Europe (OSCE), the Council of Europe (CoE), the Economic Organisation of West African States (ECOWAS), the World Bank (WB) and the International Monetary Fund (IMF). This year's volume is divided into four parts: conceptual issues; case studies on how IGOs have approached SSR in programme areas that are particularly representative of their overall action; case studies on the way various actors, primarily but not exclusively IGOs, have worked with each other in implementing SSR and supporting its implementation; and conclusions drawn from the various case studies as well as policy recommendations for future IGO work in the area of SSR/G.

Cases on Telecommunications and Networking Jul 30 2022 "This book presents a wide range of the most current issues related to the planning, design, maintenance, and management of telecommunications and networking technologies and applications in organizations"--Provided by publisher.

Management Reform in the District of Columbia Mar 02 2020

Dealing with the Past in Security Sector Reform Sep 19 2021 Security sector reform (SSR) and transitional justice processes often occur alongside each other in societies emerging from conflict or authoritarian rule, involve many of the same actors, are supported by some of the same partner countries and impact on each other. Yet the relationship between SSR and transitional justice, or "dealing with the past" (DwP) as it is also called, remains underexplored and is often marked by ignorance and resistance. While SSR and transitional justice processes can get into each other's way, this paper argues that SSR and DwP are intrinsically linked and can complement each other. SSR can make for better transitional justice and vice versa. Transitional justice needs SSR to prevent a recurrence of abuses, an essential element of justice. SSR can learn from transitional justice not only that it is better to deal with rather than ignore an abusive past but also how to address an abusive legacy in the security sector. The validity of these assumptions is tested in two case studies: the police reform process in Bosnia and Herzegovina after 1995 and the SSR process in Nepal after 2006.

Gigabit Networks: A Gigabit Ethernet Market Study Nov 02 2022

Monopoly of Force: The Nexus of DDR and SSR Sep 07 2020

The United Nations and Security Sector Reform Jul 26 2019 Multilateral organizations - the United Nations (UN) in particular - have played, and continue to play, an important role in shaping the security sector reform (SSR) agenda, both in terms of policy development and the provision of support to a wide range of national SSR processes. This volume presents a variety of perspectives on UN support to SSR, past and present, with attention to policy and operational practice. Drawing from the experience of UN practitioners combined with external experts on SSR, this volume offers an in-depth exploration of the UN approach to SSR from a global perspective.

Security Sector Reform in Southeast Asia Jan 12 2021 Successful reform of the security sector has been regarded as pivotal for a successful transition from authoritarianism to democracy by Western donors. A global cast of contributors examines SSR in a variety of policy fields in Southeast Asia, paying specific attention to the adaption of 'Western' reform concepts by local actors.

South African Mining & Engineering Journal Jun 16 2021

Network World Jan 24 2022 For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.

Routledge Handbook of Peacebuilding Aug 07 2020 This new Routledge Handbook offers a comprehensive, state-of-the-art overview of the meanings and uses of the term 'peacebuilding', and presents cutting-edge debates on the practices conducted in the name of peacebuilding. The term 'peacebuilding' has had remarkable staying power. Other terms, such as 'conflict resolution' have waned in popularity, while the acceptance and use of the term 'peacebuilding' has grown to the extent that it is the hegemonic and over-arching term for many forms of mediation, reconciliation and strategies to induce peace. Despite this, however, it is rarely defined and often used to mean different things to different audiences. Routledge Handbook of Peacebuilding aims to be a one-stop comprehensive resource on the literature and practices of contemporary peacebuilding. The book is organised into six key sections: Section 1: Reading peacebuilding Section 2: Approaches and cross-cutting themes Section 3: Disciplinary approaches to peacebuilding Section 4: Violence and security Section 5: Everyday living and peacebuilding Section 6: The infrastructure of peacebuilding This new Handbook will be essential reading for students of peacebuilding, mediation and post-conflict reconstruction, and of great interest to students of statebuilding, intervention, civil wars, conflict resolution, war and conflict studies and IR in general.

Commerce Business Daily Jul 06 2020

Statebuilding, Security-Sector Reform and the Liberal Peace May 04 2020 This book explores how and why police reform became an international phenomenon in the era of statebuilding that followed the end of the Cold War. Police reform has become an indispensable element in the spread of liberal democracy. Policing is distinguished by its ability to combine reasonable and forcible methods to preserve and spread liberal values. The book examines the reason police reform was introduced as a method of building consensus in Latin America and the Balkans and documents the development of its use in Africa, the Middle East and the Caucasus region. It illustrates how police power binds the liberal value of freedom to the security needs of post-conflict regions and discusses its force as a strategy to bring law and order to a global security domain. Drawing on a multi-disciplinary approach to the subject, the book delves deeply into policing as a method to bring coherence to global security. It traces the presence of coherent police strategies in contemporary international relations through studies of the United Nations, the European Union and the Organization for Security and Cooperation in Europe. By contrasting police reform with security sector reform, the book explores how liberal peace is imagined by the international NGO sector, state aid agencies and international organizations. This book will be of much interest to students of statebuilding, post-conflict reconstruction, critical security studies, development studies and IR in general.

Security Sector Reform in Conflict-Affected Countries Apr 14 2021 This book examines the evolution, impact, and future prospects of the Security Sector Reform (SSR) model in conflict-affected countries in the context of the wider

debate over the liberal peace project. Since its emergence as a concept in the late 1990s, SSR has represented a paradigm shift in security assistance, from the realist, regime-centric, train-and-equip approach of the Cold War to a new liberal, holistic and people-centred model. The rapid rise of this model, however, belied its rather meagre impact on the ground. This book critically examines the concept and its record of achievement over the past two decades, putting it into the broader context of peace-building and state-building theory and practice. It focuses attention on the most common, celebrated and complex setting for SSR, conflict-affected environments, and comparatively examines the application and impacts of donor-supported SSR programming in a series of conflict-affected countries over the past two decades, including Afghanistan, Sierra Leone, the Democratic Republic of Congo, East Timor and Bosnia-Herzegovina. The broader aim of the book is to better understand how the contemporary SSR model has coalesced over the past two decades and become mainstreamed in international development and security policy and practice. This provides a solid foundation to investigate the reasons for the poor performance of the model and to assess its prospects for the future. This book will be of much interest to students of international security, peacebuilding, statebuilding, development studies and IR in general.

Local Ownership and Security Sector Reform Aug 26 2019 "Geneva Centre for the Democratic Control of Armed Forces (DCAF)"--Cover.

Location-Based Services in Cellular Networks: from GSM to 5G NR Oct 28 2019 This exciting new book delivers a comprehensive overview of the cellular network architecture, with focus on the positioning applications and emergency call services, and covers aspects brought by 5G, including the core virtualization and the network slicing to optimize cellular network deployments. Focus is given to the different positioning technologies used in cellular networks, divided in satellite positioning, terrestrial radio positioning, non-RF positioning and a brief introduction to sensor fusion and Bayesian theory. It provides an overview of all the positioning technologies used in cellular networks, from GSM to 5G, from RAT independent technologies, such as A-GNSS (including GNSS evolution, RTK and PPP), WiFi, Bluetooth and sensor fusion, to cellular network native technologies, such as OTDOA / DL-TDOA, ECID, multi-cell RTT and the Angle Of Arrival (AOA) based techniques that take advantage of 5G mmWave beamforming features. Different positioning protocols, especially the LTE Positioning Protocol (LPP), which is used for LTE and 5G NR and defines the communication between the user device (mobile phone, connected vehicle, etc.) and the base station are explained extensively, and compares it with other competing protocols such as OMA LPPE. Furthermore, it also explains the core network positioning protocols (LPPa, NRPPa), that describe the communication between the location server and the core network. Explanation of different signaling parameters will enable the reader to understand better how positioning works in a cellular network. The contents of this book are aimed at all types of users, from beginners to the concept of positioning to experts that are looking to enhance their knowledge of positioning in cellular networks.
