[Kill the Company](#) Nov 02 2022 In the ever-changing world of business, we've arrived at a point where process has trumped culture, where the efficiency has left us unable to reach our potential. Stuck in the land of status quo, we've forgotten how to think. The very structures put in place as businesses grow are now holding us back;; it's time to Kill the Company. This book is a call to arms: to start a revolution in how we think and act. Instead of more one-size-fits-all change initiatives forced upon employees, we need to embrace small changes that create ripple effects throughout the organization. Lisa Bodell urges companies to move from "Zombies, Inc." to "Think, Inc." Thinking can no longer be exclusive to the creative team and strategists. A culture of curiosity must be fostered among the ranks to shake up our standard practices, from unproductive meetings to goal setting and planning. This revolution can and will awaken our ability to think, and ultimately, to innovate and grow.

Hav Sep 19 2021 A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades, recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural styles and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we see the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. published Last Letters from Hav in 1985, it was short-listed for the Booker Prize. Here it is joined by Hav of the Myrmidons, a sequel that brings the story to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.

The Book of Aug 19 2021 This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most important inventions in interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For non-mathematicians contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "O" stands for zero context between cells. It has been a major typographical problem that printers are unable to distinguish between O (zero) and O (oh). Thus, DOL was almost always written with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as co-authors in this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose independent theory of L systems has been most significant.

Complete Jazz Guitar Method: Intermediate Jazz **Aug 18 2022** This book is great for guitarists who have learned the basics of jazz harmony and improvisation. Topics include the ii-V-I progression, creating solo lines, altered chord formulas, and comping in different jazz feels such as Latin, ballad, and even funk. Continuing in the format of *Beginning Jazz Guitar*, every new concept is accompanied by etudes and songs for practice. Each chapter is clearly divided into lessons on harmony and improvisation. Packed with literally hundreds of chord voicings and improv ideas, this is a must for any serious student of jazz guitar. All music is shown in standard notation and TAB.

The Little Typer **Dec 11 2020** An introduction to dependent types, demonstrating the most beautiful aspects, one step at a time. A program's type describes its behavior. Dependent types are a first-class part of a language, and are much more powerful than other kinds of types: using just one language and programs allows program descriptions to be as powerful as the programs they describe. The Little Typer explains dependent types, beginning with a very small language that looks very much like Scheme and extending it to cover both programming with dependent types and using dependent types for mathematical reasoning. Readers should be familiar with the basics of a Lisp-like programming language, as presented in the first four chapters of *Little Schemer*. The first five chapters of *The Little Typer* provide the needed tools to understand dependent types; the remaining chapters use these tools to build a bridge between mathematics and programming. Readers will learn that tools they know from programming—pairs, lists, functions, and pattern matching—also capture patterns of reasoning. The Little Typer does not attempt to teach either practical programming skills or a fully rigorous approach to programming. Instead, it demonstrates the most beautiful aspects as simply as possible, one step at a time.

Handbook of Aging and the Health Care System **Nov 21 2021**

Issues in Aging **Jun 28 2022** Opportunities and optimism in Aging. *Issues in Aging*, 3rd edition takes an optimistic view of aging and human potential in later life. This book presents the most up-to-date facts on aging today, the issues raised by these facts, and the societal and individual responses that create a successful old age for us all. Mark Novak presents the full picture of aging--exhibiting both the problems and the opportunities that come with the older age. The text illustrates how generations are dependent on one another and how social conditions affect both the individual and social well-being. **Learning Goals** -Upon completing this book, readers will be able to: -Understand how large-scale social issues--social attitudes, the study of demographic issues--affect individuals and social institutions -Identify the political responses to aging and how individuals can create a better life for themselves and the people they know -Separate the myths from the realities of aging -Recognize the human side of aging -Trace the transition from pension plans, health, and opportunities for personal expression and social engagement to the new ecology of aging today

Janey the Vet **Jan 24 2022** 'Janey is like a whirlwind of selflessness. A beautiful spirit in a beautiful country doing a beautiful thing. I encourage you to be more 'Janey'. With more positive spirits like Janey, the world would be a better place.' - Ben Fogle In 2014 and in her mid-twenties, Janey had been a vet for just two years when she left her home in County Durham and went travelling. Visiting Sri Lanka, she was horrified to see the impact of the island's dogs, in particular the three million strays. Over 5,000 miles from home, Janey decided there and then that she was going to help them. She stayed on the island indefinitely and do everything within her power to help them. She raised £10,000 to get started, setting up a charity called WECare Veterinary. Frightened, determined and excited all at the same time, she found a local who was willing to work with her and began scouring the island for dogs in need. Some she patched up as best she could at the roadside, others she brought back and treated in a make-shift surgery she had set up in her new home. With very little equipment, she and her small team came up with new and ingenious ways to treat the animals. In this highly illustrated and heartfelt book full of challenges and adventure, Janey introduces us to her world and the tireless work she carries out. As she says, 'I feel a responsibility to my dogs and I have a responsibility to them.' In it, we meet many of the colourful characters who have come to offer help, along with the street dogs who have suffered all sorts of trauma and injury, only to be scooped up by Janey and her team and saved.
