York's Hidden Stories Nov 09 2020 This book explores the mechanics of storytelling within a study aimed at focusing on a 'hidden' population of migrants in the city of York, UK. Taking applied linguistics to mean the consideration of real-world 'problems' as identified by a 'client', in which the use of (and beliefs about) language is a significant component, the authors describe the benefits and challenges of working in a partnership with a community organisation. With project participants from Africa, Europe, Asia and South and Central America who had lived in York between two and fifty years, the study considers the co-construction of meaning in interviews from a range of practical and theoretical perspectives. The book will be of interest to students, academic researchers and community project leaders who are interested in migration stories and interviews as a method of data collection.

Crafting Writers, K-6 May 28 2022 How do we teach elementary students to independently use the different elements of craft that are discussed and taught in lessons? We begin by honoring the reality that terms like voice, sentence fluency, and writing with detail are descriptions of where we want our students to be, not next steps on how to reach those goals. In *Crafting Writers, K-6* Elizabeth Hale shows us how to identify specific elements of craft when assessing student work and planning instruction, and use them to teach students the specific craft techniques that will move them forward as writers. Liz offers practical information that teachers can use immediately in their classrooms. She also presents a concrete process for noticing craft in writing so teachers can develop and plan craft lessons based on their students' writing. Learning the techniques that make up good writing also allows teachers to see craft in many different levels of writing, a skill that is particularly powerful when conferring with below-grade-level writers. Additional chapters look closely at assessment and classroom management practices like group conferring. Most of us know good writing when we read it, but writing teachers need to know what makes it work. Filled with easy-to-use charts, and practical lessons, *Crafting Writers, K-6* provides clear insight into identifying and teaching the small elements that make good writing successful.

The authors are now making further extensions of NUSAP, including an algorithm for the propagation of quality-grades through models used in risk and safety studies.
