They must be current on topics from human evolution to industrial development in Song-dynasty China to today's disease patterns - and then link these disparate topics into a coherent course. Numerous textbooks in print and in preparation summarize the field of world history at an introductory level. But good teaching also requires advanced training for teachers, and access to a stream of new research from scholars trained as world historians. **Urban World History** Aug 11 2020 This book seeks to deepen readers' understanding of world history by investigating urbanization and the evolution of urban systems, as well as the urban world, from the perspective of historical analysis. The theoretical framework of the approach stems directly from space-economy, and, more generally, from location theory and the theory of urban systems. The author explores a certain logic to be found in world history, and argues that this logic is spatial (in terms of spatial inertia, spatial trends, attractive and repulsive forces, vector fields, etc.) rather than geographical (in terms of climate, precipitation, hydrography). Accordingly, the book puts forward a truly original vision of urban world history, one that will benefit economists, historians, regional scientists, and anyone with a healthy curiosity.

**Peace** Jan 04 2020 How peace has been made and maintained, experienced and imagined is not only a matter of historical interest, but also of pressing concern. *Peace: A World History* is the first study to explore the full spectrum of peace and peacemaking from prehistoric to contemporary times in a single volume aimed at improving their prospects. By focusing on key periods, events, people, ideas and texts, Antony Adolf shows how the inspiring possibilities and pragmatic limits of peace and peacemaking were shaped by their cultural contexts and, in turn, shaped local and global histories. Diplomatic, pacifist, legal, transformative non-violent and anti-war movements are just a few prominent examples. Proposed and performed in socio-economic, political, religious, philosophical and other ways, Adolf's presentation of the diversity of peace and peacemaking challenges the notions that peace is solely the absence of war, that this negation is the only task of peacemakers, and that history is exclusively written by military victors. "Without the victories of peacemakers and the resourcefulness of the peaceful," he contends, "there would be no history to write." This book is essential reading for students, scholars, policy-shapers, activists and general readers involved with how present forms of peace and peacemaking have been influenced by those of the past, and how future forms can benefit by taking these into account.

**The Material of World History** Oct 05 2022 This volume considers the confluence of World History and historical materialism, with the following guiding question in mind: given developments in the field of historical materialism concerned with the intersection of race, gender, labour, and class, why is it that within the field of World History, historical materialism has been marginalized, precisely as World History orients toward transnational socio-cultural phenomenon, micro-studies, or global histories of networks? Answering this question requires thinking, in an inter-related manner, about both the development of World History as a discipline, and the place of economic determinism in historical materialism. This book takes the position that historical materialism (as applied to the field of World History) needs to be more open to the methodological diversity of the materialist tradition and to refuse narrowly deterministic frameworks that have led to marginalization of materialist cultural analysis in studies of global capitalism. At the same time, World History needs to be more self-critical of the methodological diversity it has welcomed through a largely inclusionary framework that allows the material to be considered separately from cultural, social, and intellectual dimensions of global processes.

**Peasants in World History** Aug 23 2021 This is the first world history of peasants. Peasants in World History analyzes the multiple transformations of peasant life through history by focusing on three primary areas: the organization of peasant societies, their integration within wider societal structures, and the changing connections between local, regional and global processes. Peasants have been a vital component in human history over the last 10,000 years, with nearly one-third of the world's population still living a peasant lifestyle today. Their role as rural producers of ever-new surpluses instigated complex and often-opposing processes of social and spatial change throughout the world. Eric Vanhaute frames this social change in a story of evolving peasant frontiers. These frontiers provide a global comparative-historical lens to look at the social, economic and ecological changes within village-systems, agrarian empires and global capitalism. Bringing the story of the peasantry up through the modern period and looking to the future, the author offers a succinct overview with students in mind. This book is recommended reading to anyone interested in the history and future of peasantries and is a valuable addition to undergraduate and graduate courses in World History, Global Economic History, Global Studies and Rural Sociology.

**Empires in World History** Mar 30 2022 How empires have used diversity to shape the world order for more than two millennia Empires—vast states of territories and peoples united by force and ambition—have dominated the political landscape for more than two millennia. Empires in World History departs from conventional European and nation-centered perspectives to take a remarkable look at how empires relied on diversity to shape the global order. Beginning with ancient Rome and China and continuing across Asia, Europe, the Americas, and Africa, Jane Burbank and Frederick Cooper examine empires' conquests, rivalries, and strategies of domination—with an emphasis on how empires accommodated, created, and manipulated differences among populations. Burbank and Cooper examine Rome and China from the third century BCE, empires that sustained state power for centuries. They delve into the militant monotheism of Byzantium, the Islamic Caliphates, and the short-lived Carolingians, as well as the pragmatically tolerant rule of the Mongols and Ottomans, who combined religious protection with the politics of loyalty. Burbank and Cooper discuss the influence of empire on capitalism and popular sovereignty, the limitations and instability of Europe's colonial projects, Russia's repertoire of exploitation and differentiation, as well as the "empire of liberty"—devised by American revolutionaries and later extended across a continent and beyond. With its investigation into the relationship between diversity and imperial states, Empires in World History offers a fresh approach to understanding the impact of empires on the past and present.

**World History** Sep 04 2022 Conventional accounts of world history tend to focus on the rise of Western civilisation and concentrate on the story of ancient Greece, the Roman empire and the expansion of Europe. The histories of the great civilisations of China, India and Japan, and therefore the experience of the majority of the world's people, have been relegated to a minor place. World History adopts a radically different approach. Starting from the assumption that the human story has to be seen in the round, it examines the evolution of humans, their lives as hunters and gatherers and their eventual adoption of agriculture, before looking at the emergence of civilisation across the globe; in Mesopotamia, Egypt, China, the Indus Valley, Mesoamerica and Peru. It goes on to tell the story of the earliest empires, emphasising not just their differences but also their similarities. It explains how contacts were established between them and how technologies, ideas and the world's great religions travelled from one to another. It describes the great empires of Islam, of China and of the Mongols. Only towards the end of the story does Europe come slowly to dominate the world, against the background of technical innovations and social and economic change.

The Environment and World History Dec 15 2020 In 11 essays, the contributors examine the connections between environmental change and other major topics of early modern world history: population growth, commercialization, imperialism, industrialization, the fossil fuel revolution, and more.
