Does Science Need a Global Language? Oct 25 2021 In early 2012, the global scientific community erupted with news that the elusive Higgs boson had likely been found, providing potent validation for the Standard Model of how the universe works. Scientists from more than one hundred countries contributed to this discovery—proving, beyond any doubt, that a new era in science had arrived, an era of multinationalism and cooperative reach. Globalization, the Internet, and digital technology all play a role in making this new era possible, but something more fundamental is also at work. In all scientific endeavors lies the ancient drive for sharing ideas and knowledge, and now this can be accomplished in a single tongue—English. But is this a good thing? In *Does Science Need a Global Language?*, Scott L. Montgomery seeks to answer this question by investigating the phenomenon of global English in science, how and why it came about, the forms in which it appears, what advantages and disadvantages it brings, and what its future might be. He also examines the consequences of a global tongue, considering especially emerging and developing nations, where research is still at a relatively early stage and English is not yet firmly established. Throughout the book, he includes important insights from a broad range of perspectives in linguistics, history, education, geopolitics, and more. Each chapter includes striking and revealing anecdotes from the front-line experiences of today's scientists, some of whom have struggled with the reality of global scientific English. He explores topics such as student mobility, publication trends, world Englishes, language endangerment, and second language learning, among many others. What he uncovers will challenge readers to rethink their assumptions about the direction of contemporary science, as well as its future.

Geometric Modeling for Scientific Visualization Oct 01 2019 Geometric Modeling and Scientific Visualization are both established disciplines, each with their own series of workshops, conferences and journals. But clearly both disciplines overlap; this observation led to the idea of composing a book on Geometric Modeling for Scientific Visualization.

International Farm Animal, Wildlife and Food Safety Law Jul 02 2022 This volume is an inspiring and breakthrough piece of academic scholarship and the first of its kind featuring a comprehensive reader-friendly approach to teach the intricacies of the various aspects of international farm animal, wildlife conservation, food safety and environmental protection law. The selected focus areas are grouped in sections, such as agrobiodiversity, fishing and aquaculture, pollinators and pesticides, soil management, industrial animal production and transportation, and international food trade. Farm animal welfare, environmental protection, biodiversity conservation, and food safety are the core of the selected chapters. Every chapter provides real-world examples to make the complex field easy to understand. With its systematic approach, this book is devoted to

anyone interested in the subject, becomes a valuable resource for professionals working in food regulation, and provides a solid foundation for courses and master's programs in animal law, environmental policy, food and agriculture law, and regulation of these subjects around the world. Through its emphasis on sustainable food production, this work offers a cutting-edge selection of evolving topics at the heart of the pertinent discourse. As one of its highlights, this book also provides "Tools for Change," a unique compilation and analysis of laws from the major farm animal product trading nations. With these tools, practitioners, advocates, policy makers and other state-holders are equipped with information to start work toward improving farm animal welfare, wildlife conservation, and food safety through the use of law and policy.

Proceedings of China SAE Congress 2021: Selected Papers Nov 25 2021 These proceedings gather outstanding papers presented at the China SAE Congress 2021, held on Oct. 19-21, Shanghai, China. Featuring contributions mainly from China, the biggest carmaker as well as most dynamic car market in the world, the book covers a wide range of automotive-related topics and the latest technical advances in the industry. Many of the approaches in the book will help technicians to solve practical problems that affect their daily work. In addition, the book offers valuable technical support to engineers, researchers and postgraduate students in the field of automotive engineering.

Shine a Light Jan 04 2020 The exhibition highlights a selection of recent acquisitions to the NGC's Canadian Contemporary, Indigenous and Photography holdings. It showcases some of the best and most innovative works being made today in a variety - and often combination of - media, from video and film to drawing and painting, photography to sculpture and installation.

Managing and Working with Asbestos Feb 26 2022 Contains the Control of Asbestos Regulations 2012, with the various sections of the Health and Safety Executive's Approved code of practice (ACOP) and associated guidance notes inserted at the relevant points.

Gaseous Molecular Ions Nov 01 2019 Most of the matter in our solar system, and, probably, within the whole universe, exists in the form of ionized particles. On the other hand, in our natural environment, gaseous matter generally consists of neutral atoms and molecules. Only under certain conditions, such as within the path of lightning or in several technical devices (e. g. gas discharges, rocket engines, etc.) will some of the atoms and molecules be ionized. It is also believed that the chemistry of the earth's troposphere predominantly proceeds via reactions between neutral particles. (The complex system of atmospheric chemistry will be treated in one of the forthcoming volumes to this series.) Why, then, are ions considered so important that hundreds of laboratories all over the world (including some of the most prestigious) are involved in research programs on ions, covering many different facets, from biochemistry to physics? One may obtain as many different answers as there are research groups busy in this field. There is, however, one simple, common feature which makes it attractive to work with ions: since they carry one or more net elementary charges, they can easily be guided, focused or separated by appropriate electric and magnetic fields, and, last but not least, they can easily be detected. Apart from these advantages, which are welcome and appreciated by the researcher, the study of molecular ions can provide insight into very fundamental aspects of the general behavior of molecules.

Luigi L. Pasinetti: An Intellectual Biography Oct 13 2020 Luigi L. Pasinetti (born 1930) is arguably the most influential of the second generation of the Cambridge Keynesian School of Economics, both because of his achievements and his early involvement with the direct pupils of John Maynard Keynes. This comprehensive intellectual biography traces his research from his early groundbreaking contribution in the field of structural economic dynamics to the 'Pasinetti Theorem'. With scientific outputs spanning more than six decades (1955-2017), Baranzini and Mirante analyse the impact of his research work and roles at Cambridge, the Catholic University of Milan and at the new University of Lugano. Pasinetti's whole scientific life has been driven by the desire to provide new frameworks to explain the mechanisms of modern economic systems, and this book assesses how far this has been achieved.

Unlocking Constitutional and Administrative Law Dec 27 2021 Constitutional and administrative law (public law) is an essential element of all law degrees. Unlocking Constitutional and Administrative Law will ensure that you grasp the main concepts with ease, while giving you an indispensable foundation in the subject. This revised fourth edition is fully up to date with the latest key changes in the law and constitutional developments. The UNLOCKING THE LAW series is designed specifically to make the law accessible. Each chapter contains: aims and objectives; activities such as self-test questions; charts of key facts to consolidate your knowledge; diagrams to aid memory and understanding; prominently displayed cases and judgments; chapter summaries; a glossary of legal terminology; essay questions with answer plans. The series covers all the core subjects required by the Bar Council and the Law Society for entry onto professional qualifications as well as popular option units.

Elephant Child Dec 03 2019 "In this hybrid artist book/exhibition document, Henrot reconsiders source material and ideas discovered and developed during her Artist Research Fellowship at the Smithsonian Institution in 2012".

Dropping out of Socialism Aug 11 2020 This multidisciplinary collection of essays examines alternative subcultures in Eastern Europe and the Soviet Union during the era of late socialism. The contributors analyze how these marginal communities rejected mainstream socialist culture, sought ideological and physical space from the state, and contributed to the demise of the USSR.

***Nation-Building and Identity in the Post-Soviet Space* Aug 03 2022** Nation-building as a process is never complete and issues related to identity, nation, state and regime-building are recurrent in the post-Soviet region. This comparative, inter-disciplinary volume explores how nation-building tools emerged and evolved over the last twenty years. Featuring in-depth case studies from countries throughout the post-Soviet space it compares various aspects of nation-building and identity formation projects. Approaching the issue from a variety of disciplines, and geographical areas, contributors illustrate chapter by chapter how different state and non-state actors utilise traditional instruments of nation-construction in new ways while also developing non-traditional tools and strategies to provide a contemporary account of how nation-formation efforts evolve and diverge.

***14 Years Solved Papers Karnataka CET Engineering Entrance 2022* Sep 11 2020** 1. Solved papers of Karnataka CET - Engineering Entrance is complete practice package 2. This book has 14 previous years' solved papers 2007-2020 for practice 3. Well detailed answers are given for every question to understand topics In order to get into the cut off list and good engineering colleges of Karnataka, "14 Years' Solved Papers (2007-2020) Karnataka CET - Engineering Entrance" is a complete practice package that is prepared to meet all the important needs of the students who are going to appear in the forthcoming exam. Revise each and every concept of all the subjects with Previous 14 Years' Solved Papers (2020-2007). Designed according to the new pattern, this book emphasis the conceptual clarity by providing the detailed solutions of every question which are not just sketchy rather, they have been drafted in a manner that helps students to understand things easily and solve other related questions too. This extensive set of Solved Papers is worth taking into account for the greater preparation for Karnataka CET Engineering Entrance. TOC Solved Papers (2007 - 2021)

***Applying Learning Theory to Mobile Learning* Jun 08 2020** Mobile devices have become an important part of our daily lives and, because of our familiarity with the technology, present a terrific opportunity to enhance learning and development. But to incorporate mobile technology into training, we must first fully understand what mobile learning (m-learning) is, and then identify the movement, adoption, and implementation of m-learning as a learning strategy. In this issue of TD at Work, you will learn about: • the varying definitions of m-learning, as well as drivers and barriers to its use • learning theories, and how to apply those theories to m-learning • informal learning methods, and how they can be part of a learning and development professional's toolbox. "Applying Learning Theory to Mobile Learning" also provides readers with a 30-day plan for more fully understanding and appreciating m-learning.

House documents Jul 10 2020

Safety at Street Works and Road Works Feb 03 2020 This publication sets out the statutory requirements for signing, lighting, and guarding at street works and road works. This is the core reference manual for utility companies, local authorities, street work contractors and others whose day-to-day business involves street works (works by statutory undertakers and other utility companies etc) and road works (works to maintain or repair road infrastructure). The code, which covers all of the UK and includes national variations, is now compulsory for highway/road authorities in England, Wales and Northern Ireland. It applies to all single carriageway roads and dual carriageways with a speed limit of 40 mph or less. The code is now divided into three parts: Basic Principles, Operations, and Equipment and Vehicles; site layout diagrams have been redrawn to make them easier to understand. There is: increased emphasis on using risk assessment and guidance on what to consider in such assessments; strengthened guidance on providing for pedestrians and cyclists and new guidance on traffic control measures related to road closures, one-way working and temporary road obstructions; enhanced advice on other traffic control measures including works near tramways and railways, and mobile/short duration works; and updated advice on high visibility clothing and the signing and conspicuity requirements for work vehicles. Effective from 1 October 2014 when it will supersede the 2001 edition (ISBN 9780115519581).

The Lord's Resistance Army Apr 06 2020 A noted expert provides a detailed, if chilling, examination of one of the most brutal and long-lived insurgent groups in Africa: Joseph Kony's Lord's Resistance Army. • Analyzes the Lord's Resistance Army's background, ideology, and operations • Assesses how the LRA's ideology and operations compare with other armed movements • Describes various efforts to contain or end the group • Describes the larger societal and political factors that can give rise to such groups, providing context for those interested in the overall security situation in East Africa

E-Paper Displays Sep 23 2021 E-PAPER DISPLAYS An in-depth introduction to a promising technology, curated by one of its pioneering inventors Electronic paper (e-paper) has one of the most promising futures in technology. E-paper's potential is unlimited, as the displays require extremely low power and imitate the aesthetic of ink on the page. This allows e-paper devices to have a wider range of viewing angles than traditional LED products and are capable of being viewed in direct sunlight—and without any additional power. As a result, e-paper displays create less eye strain, have a greater flexibility in their use, and have the potential to be used in place of paper for billboard advertising, educational applications, and transport signage, and more. In *E-Paper Displays*, editor Bo-Ru Yang and his team of experts present a detailed view into the important technologies involved in e-paper displays, with a particular emphasis on how this technology's unique properties make possible a wide range of personal and professional electronic products. As climate change makes efficient energy use more important than ever, e-paper can become an essential tool for future products on a large scale. As we rely more and more on technology, having lightweight devices with long battery life will become critical. This book provides engineers and innovators with an introduction to this important technology and shows new pathways for development. *E-Paper Displays* readers will also find: The editor is one of the leading pioneers in this technology Contributions from an international team of experts in e-paper technology Descriptions of many advanced display types that rely on different principles than the widely used LCD and OLED types Another innovative title from Wiley-SID (Society for Information Displays) series As we enter a new stage in our industrial development, *E-Paper Displays* is an essential reference for computer engineers and developers, as well as innovators and scientists, and their students.

Cryopolitics Mar 06 2020 The social, political, and cultural consequences of attempts to cheat death by freezing life. As the planet warms and the polar ice caps melt, naturally occurring cold is a resource of growing scarcity. At the same time, energy-intensive cooling technologies are widely used as a means of preservation. Technologies of cryopreservation support global food chains, seed and blood banks, reproductive medicine, and even the preservation of cores of glacial ice used to study climate change. In many cases, these practices of freezing life are an attempt to cheat death. Cryopreservation has contributed to the transformation of markets, regimes of governance and ethics, and the very relationship between life and death. In *Cryopolitics*, experts from anthropology, history of science, environmental humanities, and indigenous studies make clear the political and cultural consequences of extending life and deferring death by technoscientific means. The contributors examine how and why low temperatures have been harnessed to defer individual death through freezing whole human bodies; to defer nonhuman species death by

freezing tissue from endangered animals; to defer racial death by preserving biospecimens from indigenous people; and to defer large-scale human death through pandemic preparedness. The cryopolitical lens, emphasizing the roles of temperature and time, provokes new and important questions about living and dying in the twenty-first century. Contributors Warwick Anderson, Michael Bravo, Jonny Bunning, Matthew Chrulew, Soraya de Chadarevian, Alexander Friedrich, Klaus Hoeyer, Frédéric Keck, Eben Kirksey, Emma Kowal, Joanna Radin, Deborah Bird Rose, Kim TallBear, Charis Thompson, David Turnbull, Thom van Dooren, Rebecca J. Impacts of COVID-19 on people's food security: Foundations for a more resilient food system Jun 20 2021

As part of the work implemented by CGIAR on COVID-19, the COVID-19 Research Hub Working Group 4 "Address food systems' fragility and build back better" was tasked with implementing a global assessment of the impacts of COVID-19 on food systems and their actors, focusing specifically on the consequences that the pandemic had brought on the food security and nutrition of those who have been affected by the crisis. This includes formal and informal actors of the food supply chains (from producers to street vendors) as well as consumers, in both rural and urban environments. Building on this assessment, the task was then to draw on key principles of resilience in the context of humanitarian and food security crisis, to identify preliminary elements of a food system resilience research agenda.

Origin of the Copper Deposits of the Ducktown Type in the Southern Appalachian Region Jun 01 2022

The ASEAN Way Nov 06 2022 The first part of the book examines the evolution of monetary policy and prudential frameworks of the ASEAN5, with particular focus on changes since the Asian financial crisis and the more recent period of unconventional monetary policy in advanced economies. The second part of the book looks at policy responses to global financial spillovers. The third and last part of the book elaborates on the challenges ahead for monetary policy, financial stability frameworks, and the deepening of financial markets.
