National Union Catalog May 04 2020 Includes entries for maps and atlases.

Industrial Relations in Schools Dec 11 2020 The subject of industrial relations is intimately connected with the nature of schooling - in particular, the teacher trade unions have played and will continue to play a crucial role in shaping the school system - yet this subject has been virtually neglected in educational literature. Mike Ironside and Roger Seifert's book redresses this balance and unravels the complex issues surrounding the employment and management of teachers. Recent changes in education have had massive implications for the way in which our education system is organised. In the light of recent events, this book questions who controls or ought to control schools, focusing on the government, Department of Education, LEA's, head teachers, school governors, parents and teaching unions. The authors argue that in order for schools to continue to function, industrial relations must be given priority, including the development of a proper framework for negotiation and the resolution of conflicts.

Protective Relaying Aug 07 2020 For many years, Protective Relaying: Principles and Applications has been the go-to text for gaining proficiency in the technological fundamentals of power system protection. Continuing in the bestselling tradition of the previous editions by the late J. Lewis Blackburn, the Fourth Edition retains the core concepts at the heart of power system analysis. Featuring refinements and additions to accommodate recent technological progress, the text: Explores developments in the creation of smarter, more flexible protective systems based on advances in the computational power of digital devices and the capabilities of communication systems that can be applied within the power grid Examines the regulations related to power system protection and how they impact the way protective relaying systems are designed, applied, set, and monitored Considers the evaluation of protective systems during system disturbances and describes the tools available for analysis Addresses the benefits and problems associated with applying microprocessor-based devices in protection schemes Contains an expanded discussion of intertie protection requirements at dispersed generation facilities Providing

information on a mixture of old and new equipment, *Protective Relaying: Principles and Applications, Fourth Edition* reflects the present state of power systems currently in operation, making it a handy reference for practicing protection engineers. And yet its challenging end-of-chapter problems, coverage of the basic mathematical requirements for fault analysis, and real-world examples ensure engineering students receive a practical, effective education on protective systems. Plus, with the inclusion of a solutions manual and figure slides with qualifying course adoption, the Fourth Edition is ready-made for classroom implementation.

[Evaluation of Library and Information Services](#) Aug 26 2019 Provides update to current thinking about, and reasons for, service evaluation of libraries in the UK. Examines quantitative and qualitative methods including questionnaires, focus groups, suggestions boxes and interview techniques. Problems arising from survey outcomes are summarised and long-term evaluation and the relevance of benchmarking are discussed. Contains case studies covering survey work in public, academic and special libraries; charters and service level agreements; and examples of relevant research projects. New chapter on performance measurement in the electronic library.

Kill the Company Jul 30 2022 In the ever-changing world of business, we've arrived at a point where process has trumped culture, where the race toward efficiency has left us unable to reach our potential. Stuck in the land of status quo, we've forgotten how to think. The very structures put in place to help businesses grow are now holding us back;; it's time to Kill the Company. This book is a call to arms: to start a revolution in how we think and work. But instead of more one-size-fits-all change initiatives forced upon employees, we need to embrace small changes that create ripple effects throughout the organization. Lisa Bodell urges companies to move from "Zombies, Inc." to "Think, Inc." Thinking can no longer be exclusive to the creative team or lead strategists. A culture of curiosity must be fostered among the ranks to shake up our standard practices, from unproductive meetings to go-nowhere strategic planning. This revolution can and will awaken our ability to think, and ultimately, to innovate and grow.

The Grace Walk Experience Jun 16 2021 For years, Steve McVey's Grace Walk (more than 200,000 copies sold) has inspired Christians to leave behind a performance and fear-based faith to embrace a faith lived in abundance and grace. Now The Grace Walk Experience workbook helps readers move that message of hope from their heads to their hearts as they explore eight truths that have changed lives worldwide daily, interactive studies that reveal grace as much more than a doctrine ways to quit "doing" for God so that He can live through them illustrations of the wonder and miracle of faith as God intended God's Word, salvation, and evangelism with new perspective This excellent tool for church classes, small group discussion, and individual study will lead believers to understand their identity in Christ, let go of legalism, and make room for the overflowing love, mercy, and purpose of life lived wholly in God's grace.
