Governance and Governmentality for Projects Jun 16 2021 This research-based book takes an organization-wide perspective to describe the governance and governmentality for projects in organizations. Governance of projects defines and directs the ways managers of projects, programs, and project portfolios carry out their work. Governmentality is the way the managers of these managers present themselves to those they lead. Governance and Governmentality for Projects starts with introducing existing theories, models and paradigms for governance and governmentality. It then develops a chronological framework of the ways governance and governmentality for projects is enabled in organizations, how it subsequently unfolds in organizations of different types and sectors, and the consequences of different governance approaches for project results, trust, control, and ethical issues in projects. Special emphasis is given to the link between corporate governance and the governance of project, programs and project portfolios. Three real-life case studies exemplify the research findings described in the book. Through its structure this book describes the development of governance and governmentality in the realm of projects from its organizational origins, via observable practices, to expected consequences of different implementations. Aimed at academics, post-graduate students in business and management, reflective practitioners, standards or policy developers, those in governance roles and others in need of a detailed knowledge of the spectrum of project related governance in organizations, this book will help develop a comprehensive understanding of the theoretical and practical underpinnings of the subject, their interaction, and implications for implementation. This allows for understanding and developing of both generic and idiosyncratic governance structures, such as those needed in project-based organizations.

The Psychology of Effective Management Oct 28 2019 The Psychology of Effective Management combines basic psychological principles with practical recommendations for building positive and productive manager-employee relations. Each recommendation is based on real-life situations taken from respected scholars in the field, as well as the author's own professional experiences. With particular attention to the human element of management, the practical advice presented in this book is aimed at helping managers create a positive psychological environment in the workplace and lead their employees into a productive and satisfying professional life. The content is presented in an easy-to-follow format so that any manager can put his or her knowledge immediately into practice. By striking a compelling balance between the science and practice of management, this will be an indispensable resource for managers, administrators, and business owners at all levels as well as students of business and management.

Sport Management Sep 27 2019 Sport Management: principles and applications provides a comprehensive introduction to the practical application of management principles within sport organisations operating at the community, state, national and professional levels in club based sporting systems. It presents an international balanced view between accepted practice and what research evidence tells us about the application of a range of management principles and practices in sport. Structured in three parts it investigates: The history of the evolution of sport and the current drivers of change in the sport industry, the role of the state, non-profit and professional sectors in sport. Core management principles and their application in sport, highlighting the unique features of how sport is managed compared to other sectors of the economy. This will include discussion and insight into organisational behaviour, organisational culture, strategic planning, organisational structures, human resource management, leadership, governance, and performance management. The future management challenges facing the sport industry. Each chapter has a coherent learning structure complete with international case studies as follows: A conceptual overview of the focus for the chapter. A presentation of accepted practice supported by specific organisational examples at the community, state/provincial, national and professional level. These organisations will include examples from countries such as New Zealand, Australia, and the UK. A presentation of research findings from around the globe. A summary of guiding principles for the focus of the chapter based on a balanced view of practice and research. A section of teaching and learning resources including a reference list, lists for further reading, relevant websites, tutorial activity or study questions, potential research questions and online PowerPoint lecture slides for each chapter. It provides the foundation for introductory sport management subjects, and is ideal for first and second year students studying sport management related courses and those studying sport management within business focussed courses, human movement / physical education courses seeking an overview of sport management principles.

Infranomics Feb 10 2021 This book provides a rough entry into the interdisciplinary field of Infranomics. It enables better decision making in an increasing ambiguous, complex, emergent, interdependent, and uncertain world where we attempt to anticipate modern society trends and patterns in order to react appropriately. However, as with any emerging discipline, much research is needed at the applications and conceptual level. The applications level may require development and testing of methods, tools, and techniques to enable analysis and decision-making in ambiguous, complex, emergent, interdependent, and uncertain conditions while the conceptual level may require tapping into driving philosophies, theories, and methodologies that form the basis for Infranomics. Striking the right balance between applications and conceptual foundation (theory) requires rigorous research. This book provides a springboard for robust discussions on applications, theory, and transformation of current thinking to better deal with modern society's problematic issues using Infranomics.

Public Accelerators in Entrepreneurial Ecosystems Nov 29 2019 Entrepreneurial ecosystems have recently received considerable attention from scholars and policymakers. This study sheds light on public accelerators as anchor tenants of entrepreneurial ecosystems and aims at investigating their roles in the early ecosystem evolution. Based on a single case study with the Santiago entrepreneurial ecosystem in Chile, this study reveals five steps in which public accelerators orchestrate resources and develops a framework of the role of public accelerators in the evolution of entrepreneurial ecosystems.

Business and Management Practices in South Asia Dec 31 2019 This book presents case studies of South Asian companies that have strategic business implications, highlighting the complex interplay of business and social dynamics in South Asia. This region is a wide agglomeration of very different countries that share somewhat common cultures and issues and yet it is torn apart by religion and politics. There is an abundance of local entrepreneurship but a widespread institutional void. The book investigates how local companies survive and thrive in this environment and discusses those companies that have withstood the competitive pressure of MNCs, depicting their management and business practices. In today's world, where multinationals are so omnipresent that their management and business practices are considered as the de facto recipe for success, there is a need to have an alternative view that challenges the ubiquitousness of multinational management practices. The case studies in this book focus on the business and management practices of local organizations in South Asia and thus provide that alternative viewpoint of how to achieve success in South Asia. Exposing readers to a local perspective on doing business in South Asia, it is a valuable resource for students and practitioners of management.

The Manager Mar 26 2022 From the post room to the board room, everyone thinks they can be the manager. But how do you manage outrageous talent? What do you do to inspire loyalty from your players? How do you turn around a team in crisis? What's the best way to build long-term success? How can you lead calmly under pressure? The issues are the same whether you're managing a Premier League football team or a FTSE 100 company. Here, for the first time, some 30 of the biggest names in football management reveal just what it takes. With their every decision, remark, skill, and success or failure under constant scrutiny from the media and the fans, these managers need to be the most adroit of leaders. In *The Manager* they explain their methods, give examples of lessons they've learned along the way, and describe the decisions they make and the leadership they provide. Each chapter tackles a key leadership issue for managers in any walk of life and, in their own words, shows how the experts deal with the challenges they face in an abnormally high-pressure environment. Offering valuable lessons for business leaders and fascinating behind-the-scenes insights for football fans, *The Manager* is an honest, accessible and unprecedented look at the day-to-day work of these high-profile characters and the world of top-level football management. Contents: A Piece of the Action (Roy Hodgson); The Art of One-on-One (Carlo Ancelotti); Behind the Scenes (Jos   Mourinho); Pursuing a Career Under Pressure (Brendan Rodgers); Seeing the Bigger Picture (Harry Redknapp); Creating Sustained Success (Sir Alex Ferguson); Crisis Response and Turnaround (Walter Smith); Triumph and Despair (Mick McCarthy). Also featuring: Gerard Houllier, Tony Pulis, Martin O'Neill, Neil Warnock, Howard Wilkinson, Kevin Keegan, Dario Gradi, Andre Villas-Boas, David Moyes, Alex McLeish, Hope Powell, Martin Jol, Glenn Hoddle, Chris Hughton, David Platt, Paul Ince, and George Graham.
