[Physiological Processes in Plant Ecology](#) Aug 31 2019 In the spring of 1969 a small meeting was convened at the CSIRO Riverina Laboratory, Deniliquin, New South Wales, to discuss the biology of the genus *Atriplex*, a group of plants considered by those who attended to be of profound importance both in relation to range management in the region and as a tool in physiological research. The brief report of this meeting (Jones, 1970) now serves as a marker for the subsequent remarkable increase in research on this genus, and served then to interest the editors of the Ecological Studies Series in the present volume. This was an exciting time in plant physiology, particularly in the areas of ion absorption and photosynthesis, and unknowingly several laboratories were engaged in parallel studies of these processes using the genus *Atriplex*. It was also a time at which it seemed that numerical methods in plant ecology could be used to delineate significant processes in arid shrubland ecosystems. Nevertheless, to presume to illustrate and integrate plant physiology and ecology using examples from a single genus was to presume much. The deficiencies which became increasingly apparent during the preparation of the present book were responsible for much new research described in these pages.

The Presented Past Jul 11 2020 The Presented Past is concerned with the differences between the comparatively static, well-understood way in which the past is presented in schools, museums and at historic sites compared to the approaches currently being explored in contemporary archaeology. It challenges the all-too-frequent representation of the past as something finished, understood and objective, rather than something that is "constructed" and therefore open to co-existing interpretations and constant re-interpretation. Central to the book is the belief that the presentation of the past in school curricula and in museum and site interpretations will benefit from a greater use of non-documentary sources derived from archaeological study and oral histories. The book suggests that a view of the past incorporating a larger body of evidence and a wider variety of understanding will help to invigorate the way history is taught. The Presented Past will be of interest to teachers, archaeologists, cultural resource managers, in fact anyone who is concerned with how the past is presented.

The Boy in the Oversized Smock Nov 02 2019 This is the simple but powerful biographical story of Mensa. Mensa went to school under the colonial British educational system during the eventful post-independence years. The profession of his parents, who were both teachers, put him always on the move. But his problems of movement were compounded when the parents divorced. Eventually he ended up in boarding school, and he loved it to death because the alternative was a nonexistent home life. The novel captures his life from school to school, hopping from home to home. It is mostly about boarding school life interlarded with wicked humor. A parallel poignant story is the story of kids from broken homes, especially the one in which the woman plays the role of the vanished parent.
